### A. Speakman, M.P. at Crossfield Monday

Mr. A. Speakman, M.P. for Red Deer and Mr. R. M. McCool, M.L.A. will address a public meeting in the U. F. A. Hall on Monday, November 5th at 8 p.m.

Mr. Speakman is one of Western Canada's outstanding representatives in the House of Commons. He is recognized as the leading advocate of problems concerning the returned men. He also took a very prominent part in framing the New Marketing Act and the Farmers Debt Arrangement Act. On Monday evening Mr. Speakman will deal thoroughly with these pieces of legislation.

Mr. McCool will devote his time entirely to a report of the last session of the Alberta Legislature explaining the different Acts that were passed.

This will be a real opportunity to discuss matters of vital importance to all. Everyone should make an effort to be present.

### Liberals Organize

Wednesday night a number of Liberals of the district gathered in the Fire Hall in an informal way and selected a man in each polling division to call and hold a primary in his division for the purpose of electing delegates to attend the Bow River Federal Constituency Convention which will be held in the Elks Hall, Calgary, on Nov. 15th at 2 p.m.

This convention will nominate a candidate to uphold the principles of Liberalism in the forthcoming Dominion elections.

### An Outstanding Event

Interest to a very high degree has permeated the district in connection with the Entertainment of the Crossfield Dramatic Society, and now that date has come and gone, the comments of the patrons who attended run something like this:—

"An outstanding event in the annals of local theatricals." "The show of the year." To those who did not attend we say make up your mind to do so when next the Local Theatians appear, for they are to judge by the opening efforts of the Society, then as time progresses each succeeding production should be stronger and stronger.

Lighting effects, sound effects, something that very few local dramatic societies in small towns can boast of, were in full effect, and greatly enhanced each particular play. Scenery and every detail attended to carefully, and those in charge of the stage arrangements are deserving of much praise, for the way they handled their end of the entertainment, for after all without competent men behind the scenes, the players in front would get no where, for its from the confidence instilled by those unseen workers, that the actors themselves realize that everything necessary for the play is being looked after, and that the props, sounds, etc. will come at the proper time.

Messrs Hall McCaskill, and Fred Stevens deserve great credit for the work done in building the scenery, and Messrs Bannister and Grant for the splendid stage lighting and effects.

Next week we will give a brief report of the play and the players, but owing to re-construction of the printing office, much valuable material will require to be held over until an other issue.

### Wm. Rowney Injured When Cream Separator Goes to Pieces

Wm. Rowney met with an unusual accident on Monday evening, while separating milk in some way a screw came loose and the separator bowl and other parts went flying around the room as if the machine had exploded. One of the parts hit Mr. Rowney on the mouth, causing a wound on his upper lip that required four stitches to close.

### Farmers to Consider Telephone Purchase

A meeting will be held in the Sunshine School on Friday, Nov. 2nd, at 2.00 o'clock prompt, with a view to having the farmers purchase the rural lines in the Crossfield district.

Mr. Higgins, General Supt. of Calgary, will be present to explain the Government proposals for sale of the lines. It is estimated with 110 subscribers, the lines would cost approximately \$22.00 for each phone. One fourth of the total price is to be paid this fall, the balance in two payments within two years. A charge of 60 cents per month is to be paid the local telephone exchange for continuous service. Toll rates will be charged extra as usual. The farmers owning the line will be responsible for its upkeep.

Many new companies have been formed throughout the Province and the average new rate is around \$1.60 per month. We are informed that nearly 100 per cent. increase in subscribers has already taken place. Therefore every present and intending subscriber should attend this meeting.

### United Church Celebrate Twenty-Ninth Anniversary

The 29th anniversary services of the United Church were held on Sunday last. Rev. J. N. Wilkinson, Calgary, conducted the service at Rodney in the morning and at Crossfield in the evening.

At the evening service the choir rendered special music, also Miss L. Dick of Carsland, acted as soloist.

The social evening held in the United Church Monday evening in conjunction with their 29th anniversary was an outstanding success. Two hours of real entertainment that would be a credit to any city.

The programme was nicely arranged with a variety of readings by Miss Kathleen Green of Calgary. Solos by Mrs. Rainsack of Crossfield and Miss Dick of Carsland, and duets by Shiedal Bros. of Carsland.

The church was filled and those not present missed a real treat.

### Oxford Group Service

On Sunday, November 4th the Oxford Group will hold a service in the United Church at 7.30 p. m. An afternoon service will also be held at the home of Mrs. Cowling at 3 o'clock. All are cordially invited to attend.

### Village Cop Has Punch

A number of women were out mallowe'ening on Wednesday night. They kept strictly within the law although when three of them approached Constable Belshaw, and being dressed in men's attire, he evidently thought he was to be taken for a ride, and as one of them grabbed his arm, he struck out with the other and down went one of the fair maidens, although not for the count. The lady suffered the loss of one molar and a cut lip.

### Phil Whittaker Loses \$500 Cash

P. H. Whittaker had the misfortune to loose \$500 in cash out of his pocket on the Main Street of Drumheller on Thursday of last week.

Mr. Whittaker had drawn the money to pay off his threshing crew. Shortly after he missed it from his pocket.

Phil is well known to this community, and it appears he has been getting the tough breaks lately, and the best wishes for a change of fortune is extended to him.

Mr. and Mrs. C. C. Stafford are leaving tomorrow (Friday) on an extended visit to the United States. They will visit relatives at Spokane, Wash. and then gone on to Oregon. Mrs. Stafford has been in ill health for some time and it is hoped the change will be beneficial.

## The People's Responsibility

No apology need be offered to the readers of this column, we feel sure, for again discussing the same subject that formed the topic of last week's article, namely, the ever mounting toll of deaths and serious injuries attributable to automobile accidents. The most effective way of minimizing as far as possible these tragedies is, it will be admitted, the arousing of public opinion because, unless public opinion is aroused, all the preventive laws in the world will not prove effective.

In conversation with the writer the other day a mother of a family, careful, conscientious, intelligent and of the very best type of Canadian citizen, one who takes a keen and active interest in all movements for the betterment of the community and province in which she lives, stated that only recently she and her husband had the narrowest of escapes from a serious and probably fatal car accident. Let us recite the simple circumstances.

Driving at a moderate rate, her husband at the wheel came to a point where the making of a left turn was necessary. He proceeded to make it. At the same moment the driver of a car behind them speeding at forty miles an hour decided to pass ahead. Without slackening speed and without sounding his horn in warning to the car ahead, he shot past, thus violating the rules of the road in at least two respects. He side-swiped the car in which the lady and her husband were driving, smashed a headlight to smithereens, tore off the front bumper, and all but wrecked the car. But, added the lady, we too, were to blame because my husband had neglected to put out his hand indicating his intention to make the left turn. Fortunately no person was hurt.

All simple things,—failure to sound a horn before attempting to pass the car ahead, failure to reduce speed when overtaking and passing the car ahead, failure of the car ahead to indicate its proposed change of direction, and three lives endangered, several children narrowly escaped being orphaned, two families barely saved from lasting sorrow and much suffering. The laws were sound enough, a policeman right on the spot could not have enforced those laws in time to prevent a tragedy. Two individuals were alone responsible for placing their own lives and that of others in jeopardy. Either one of them could have avoided this near calamity.

It is probable that as these lines are being written other near-accidents of a more or less similar nature are taking place, and possibly serious injuries and even death are the result. Who is to blame? The people themselves. Nobody else. And such accidents will continue and multiply until people by observing all laws and regulations, and through the exercise of proper caution at all times, put an end to such accidents.

In this article, too, emphasis may well be placed upon the terrible menace of "glaring headlights." They are prohibited by law, yet are to be found upon practically every road and highway every night. Glaring headlights—which blind the driver of any approaching car, making it impossible for him to judge his distance from the approaching car which has blinded him or to see what is ahead of him. And because one car with such lights burning, the other driver refuses to form his light, and two high powered cars at each other—sometimes they pass safely, sometimes they do not, and all too frequently even when a head-on crash does not result, one or both cars end up in the ditch, or meet some other adverse fate.

The owner of the "glaring lights" is apparently quite reckless and indifferent to the fact that by blinding the driver of approaching cars he may be inviting his own death, because the blinded driver may smash into him; and when driver No. 2 refuses to dim his lights because the other fellow did not, he is only multiplying his own risks because he is blinding the other fellow. Again, who is to blame for the catastrophes which so frequently follow? Not the law, because the actions of these car drivers is unlawful. Nor can any army of policemen be maintained along every highway to enforce the law. The best that is possible is to make examples of people when they can be caught.

It is people themselves who are to blame, and it is well nigh impossible to identify the culprits because the glaring lights renders the taking of car license number extremely difficult. It is public opinion that must first be aroused and educated to put a stop to these violations. It is not legislators, governments and police forces which alone have responsibility in this matter; the greatest responsibility rests with the individual citizen. And until individual citizens in far greater numbers than at present discharge that responsibility, humanity must pay the price, and this terrible blot rest upon our much vaunted civilization.

## Way to Ease Headaches, Pain Almost Instantly

METHOD OFTEN RELIEVES NEURALGIA AND RHEUMATIC PAINS IN MINUTES!

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

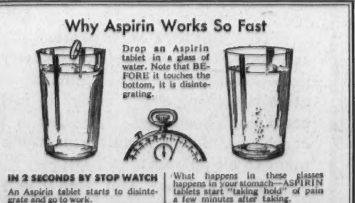

Millions have found that Aspirin eases even bad headache, neuralgia or rheumatic pain often in a few minutes!

In the stomach as in the glass, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show this: Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get **ASPIRIN**. It is made in Canada, and all druggists have it. Look for the Bayer logo in the form of a cross on every Aspirin tablet.

What happens in these glasses? An Aspirin tablet starts to disintegrate and go to work.

## Japan Starts At Six

Boys Begin Their Military Training

At Early Age

Italy has started to train all boys from the age of eight years; but that is two years later than the time set in Japan where boys begin their military education at the age of six, using real rifles and machine guns but with blank cartridges at twelve years of age. Every Japanese boy imbibes the philosophy that it is a great and glorious thing to die for the emperor and for Japan. It will be remembered that Japan has evolved a new kind of submarine, guided by a man inside who steers it at a warship or other target, knowing that impact means not only explosion of the torpedo but death to himself; yet it is said there are more volunteers than available torpedoes.

## Try KRUSCHEN NOW!

At no expense to you

If you suffer from rheumatism, sciatica, lumbago or neuritis you should try Kruschen Salts right away because your druggist is offering a FREE trial of Kruschen for a limited time only. Ask him for the Kruschen Gland Package which contains a regular bottle and a FREE Trial Bottle. After using the Trial bottle, continue with the Regular bottle—unless you are not completely convinced that Kruschen will do everything claimed for it, in which event your druggist will return your money if you take back the regular package unopened.

But millions of people testify as to Kruschen's effectiveness, for in 116 different countries nothing else has been found that gives the same results as Kruschen. Get your FREE package today. The supply of Free Trial bottles is limited.

## Recommended As Reducer

In Seventeenth Century Tea Was Supposed To Be Slimming

Tea, in the seventeenth century, was recommended as a means of slimming. In an exhibition now in the Victoria and Albert Museum, London, of English silversmiths' work is quoted an old advertisement which says that China Tea, or Tay, "was to be of great avail to men of corpulent bodies and to such as eat meat." Apparently the ladies were not so keen on slimming at those days. Tea-drinking, anyhow, must have been rather a trial when it was first introduced into this country, for the small bowls out of which the liquid was drunk had no handles, and people were compelled to hold them by the lip or poled in their fingers.

## MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Werne's Powder is the world's largest seller and prescribed by leading dentists: It feels so truly—they fit so comfortably—that all day long you forget you ever had a false plate. Leaves a clean, gummy paste—keeps mouth sanitary, breath pleasant—the best powder you can buy yet cost is small—any druggist.

## Census Taker Turns Dentist

Extracted Teeth For Indians During Tour Of James Bay Area

When Rev. J. Emile Sandson went to work for the Dominion Bureau of statistics, he was a competent census taker, but to-day, as a result of his official labors, he is a first-class amateur dentist.

He was engaged by the bureau to take a census of the Indians living along the eastern shore of James Bay. But he found that wherever he went in pursuit of figures, he was met by appeals from redskins to extract their aching teeth.

At one remote spot he sat down and solemnly pulled out Indians' teeth for several hours. Altogether he made more than 100 extractions during his tour.

## Making It Clear

K. C. Banks proposed to post himself to British Columbia, and thought it advisable that he should be marked: "This way up." In the event of his deciding on air mail, and yet wishing to wear a hat, the following note on past history may be useful. Toward the end of the war a gadget was obtained for the R.A.F. which the makers marked: "To be stored upside down." The air ministry added the instruction: "To avoid confusion, the bottom should be called the top."

Heart disease held third place among causes of death in the United States in 1900; in 1930 it had become the leading cause.

A pocket-sized wind gauge is a device being used by aviators in Russia.

W. N. U. 2070

## WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT (Grapho-Analyst) (All Rights Reserved)

(Editor's Note: Not for a long time, a series of articles aroused much interest in this series on Character from Handwriting. Hundreds of readers have written, requesting a personal analysis of their own writing, and the author invites you to send in for a reading. See the announcement at the foot of the article.)

This week, a gentleman from West wrote to ask me for my advice. He is a widower, with two young children, and feels that he should marry again, so that his children will have the proper attention.

He has been corresponding with several ladies, and sends me specimens of his own writing, and that of his several correspondents, with a view to finding which one is most suitable for him.

His own writing is that of a quiet unassuming man. There is little aggressiveness shown in his writing, and he is of a rather shy nature, somewhat aloof—not because he does not feel things, but because his nature is reserved. He has a deep capacity for feeling, but is backward in expressing it.

His nature has a good deal of generosity. And he has a very cultured mind. He likes good literature, and art will have an especial fascination for him.

The writing of the lady I shall call No. 1 shows a very emotional nature. She is at the beck and call of her emotions. She has a quick temper, likely to flare out at any time, and will very likely do things, and say things, in that mood, which she will be sorry afterwards—after the damage is done.

No. 2 is serious, and there is a good deal of affection in her nature. And she exudes energy. She must be always on the go.

Here is a type that expresses itself in bridge parties, organizing teas and social gatherings. She will be in her element as a club organizer.

Taking up the writing of No. 2, I find a totally different personality. She has an even temperament, well-balanced, and unlikely to be either too reserved on the one hand, or of the hysterical type on the other. She has a calm and normal temperament.

She displays quite a lot of generosity, has a good deal of enthusiasm, but will rarely get excited. She has a neat and orderly mind, and is a good home-builder. She, too, is affectionate, but she is also kindly, and is considerate of others.

No. 3 has a good deal to write very much at one time that she is unreliable. She is very dramatic, and needs much attention to her own interests. She looks after herself, first, last and all the time.

I think my readers will have little difficulty in judging which of my correspondents has the best handwriting. No. 2 lady has all the qualities that will make my correspondent happy. She is kind and attentive to his children, and she will make him a good wife.

Let this well-known Grapho-Analyst do the rest for you. He will also tell you what your friends are really like. Send me your handwriting, and I will analyze it, and enclose 10c coin for each. Send with 3c stamped address envelope. All letters strictly confidential, and replies will be sent as soon as possible, but please allow about two weeks for your reply.

## INFANTS' COLDS Relieved!

Young children easily catch cold. Baby's Coughs, Colds, and Croup, are easily relieved by Baby's Own Tablets. If I notice that there is any sign of a cold, I give Baby's Own Tablets and find they are a great help. Mothers of mothers do the same not only for colds but for fretfulness, teething troubles, colic, upset stomach and so on. Baby's Own Tablets are safe and sure in relieving childhood's common ailments.

Dr. Williams' BABY'S OWN TABLETS

## Bananas Grown In Ontario

Toronto Man Picks A Hundred Choice Samples Of Fruit From Tree

From a fruit-lookout banana tree left over from the Jamaica exhibition at the Canadian National Exhibition two years ago, Arthur J. Frost has picked about 100 bananas which are said to be superior in flavor to the imported fruit.

He planted the tree in his greenhouse in Toronto and early this year it reached such a height the roof had to be raised. Buds appeared in April, turned up like cobs of corn. Further developing they ripened. There are still 100 bananas, varying in degrees of ripeness, on the tree.

Allex (to garage man)—"Henry Gearshift tried to make me believe he'd driven the same car for five years and never paid a cent for repairs. Do you believe that?"

Garage man—"Yes! I'm the fellow who's made all the repairs."

There is no substitute for Chantecler or the DOUBLE AUTOMATIC BOOKLET ONLY 5¢

Chantecler CIGARETTE PAPERS

EASY TO HANDLE IN THE CONVENIENT POCKET SIZE

## Exhibition Of Inventors

Rubber Collar Stud One Of New Gadgets Shown

A humane collar button guaranteed not to torture the wearer by digging into his neck, was among hundreds of newly patented devices displayed at the Exhibition of Inventors, which was opened in London recently.

Made of rubber, the new stud is attached to the shirt to make dressing easier, and its inventor says it can withstand laundering.

Most of the exhibits were gadgets to make housekeeping simpler. There was a combination brush and pan that lifts dust by pressure on the handle, an automatic window cleaner that does away with the use of a squeegee, and a self-emptying bread box.

One ambitious enterer exhibited double-sided neckties, and another showed an egg-opener that lifts the top of a boiled egg neatly off without cutting the yolk.

But there were more pretentious exhibits, too. One was a four-legged frame on wheels for teaching the baby to walk. Another was a "visual piano" with apparatus that produces color corresponding to the notes and rhythm of the music.

A hopeful inventor from Somerset exhibited a new device for tramping, which he said was already being used in several hospitals.

The British building boom was reflected in an unusually large number of simple locks for doors, sink filters, adjustable draught excluders and new compositions for making bricks.

## Takes Place Of Sails

"Autogyro Aeroplane Windmill" Is Success In Tests

A most interesting experiment, which may be attended with important results, has been tried out by Lieut.-Colonel Moore-Brabazon, M.P., noted British aviator. He has constructed a boat with what is called "autogyro aeroplane windmill" to take the place of sails. The principle of the autogyro is applied to the sailing vessel, with this important difference—that the blades are fixed to the mast vertically, looking like a windmill's arms. It is reported that the method has come fully up to expectations, the boat making almost as good headway against the wind as with its blades being rotated by the wind from whatever quarter it blows. In a twenty-mile-an-hour wind the blades turn at 200 revolutions per minute, at which rate the tips of the blades are travelling at 200 miles per hour. Once the autogyro is rotating, there is nothing else to be done aboard but steer. Results of the experiment are now receiving the expert consideration of the Royal Aeronautical Society.—Hamilton Spectator.

Mostly Pedestrians  
More than 7,000 road accidents which resulted in 7,202 deaths were analyzed by British police, who found that only 219 of the dead were drivers of motor cars, while 3,517 were pedestrians, 1,324 bicyclists and 1,308 motorcycle.

Expectant Mothers  
Mrs. Wm. Arthur of 25 Victoria St., Stamford, Ont., says: "I am the mother of six children and Dr. Pierce's Food for Mothers brought me through each period of pregnancy in the best of health. It relieved my nervous system, strengthened my entire system."

Write to Dr. J. C. Rhea, Buffalo, N. Y., for free medical advice.

A "charivari" means a tin-pan serenade. These serenades are still used among some French villagers as a means of protest to an unsuitable marriage taking place in the village.

American medical authorities have contradicted the well-known theory that we get indigestion if we drink water with our meals.

LESS THAN 1¢ WORTH IN A CAKE

MAGIC

JUST THINK—it takes less than 1¢ worth of Magic Baking Powder to make a delicious three-layer cake! And Magic is always dependable—gives the same perfect results—every time. No wonder Canada's leading cookery experts say it doesn't pay to take chances with inferior baking powder. Bake with Magic and be sure!

"CONTAINS NO ALUM." This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

MADE IN CANADA

MAGIC BAKING POWDER

## European Countries Showing Some Sign Of Relaxing Nationalistic Trade Policies

Germany, Italy and France are showing signs of relaxing slightly their nationalistic trade policies, in the opinion of Dr. T. W. Grindley, chief of the Dominion bureau of statistics' agricultural division, who was a Canadian delegate at the Bad Ellen conference of agricultural economists. But otherwise little indication of a relaxation in tariff and other trade barriers in agricultural products was visible at the parley.

Dr. Grindley went to Bad Ellen accompanied by Dr. J. E. Atomer, professor of agricultural economics at Macdonald College, and Dr. W. Aen, professor of farm management at University of Saskatchewan, after attending the London wheat conference with John I. McFarland, head of the wheat pool's central selling agency. Views held by economists at the conference in Germany were "highly interesting" in the light of the world wheat situation, he said.

Internal conditions responsible for slackening of rigid trade policies in Germany, France and Italy were outlined by Dr. Grindley. Germany had a short crop, and has to import wheat, rye and coarse grains, some coarse grain coming from Canada, but most of it from Poland under a bilateral treaty.

Although France has a heavy surplus of soft wheat, hard wheat is needed for milling purposes, and that country is ready to take Canadian hard wheat. A relaxation of the Mussolini's agricultural program in Italy indicates a lessening of the emphasis placed on wheat production there. Italy's wheat barriers may be somewhat relaxed as a result.

While fear of war cutting off food supplies may have been a factor in the initiation of the present agricultural policies in Europe, Dr. Grindley believes it is no longer an influence. The main idea seems to be to keep the large agricultural populations of Europe contented and prosperous.

From this point of view the policy pursued has been undoubtedly effective. Farmers in Great Britain and Germany are highly prosperous, comparatively, he said. The United Kingdom has not gone as far as other European countries in tariffs, but has gone farther in quotas and fixed prices. French and Belgian farmers with their small holdings cannot be compared readily with Canadians, but they too are benefitting from assistance and protection.

### Sows Wheat From 'Plane

**Soviet Union Finding Method Successful**

More than a million acres of grain, in preparation for the harvest of 1935, will be sown in the Soviet Union from aeroplanes.

Air-sowing, first tried experimentally in 1931, has been declared a success. In the quality of work, sowing from aeroplanes equals that done either by hand or by tractor-drawn machines, the government's agricultural experts have found.

And the speed with which the job can be done is greatly in excess of any other method.

In 1933, it has been announced, each aeroplane engaged in sowing seeded between 1,000 and 1,250 acres in a day, planting a total of 1,000, 110 acres, an area that will be somewhat increased for 1935.

In addition, it is declared, districts sown from the air showed a yield 10 per cent. greater than similar fields sown by hand.

Aeroplanes equipped for grain planting carry seed in large tanks from which it drifts down to the land. Best results, it has been determined, are achieved when pilots keep an absolutely straight line between two markers set up to guide them, and shave the ground as closely as possible.

Also among the advantages claimed for the new method is that, from aeroplanes, super-early sowing—an important advantage in view of the short Russian summer—is possible.

Aeroplane, it is pointed out, can pass over and seed fields which are inaccessible to heavy machinery because of the mud and melting snow.

### Answer That

A well-known Royal Academician, who noticed a drawing of a fish by a pavement artist, asked the man what sort of a fish it was supposed to be.

"A shark, sir?"

"But you've never seen a shark," said the R.A.

"That's true, sir," the man agreed; "but then, don't some of those Academy chaps paint angels?"

W. N. U. 2070

### Finds People Honest

**Illinois Farmer Says Stranded Car Drivers Play Fair**

Oscar Martin, farmer residing near Mason City, Illinois, has developed a great confidence in the honesty of the motoring public as a result of ten years of contact with motorists.

Living near a state highway, Martin has been called on frequently late at night by motorists whose gasoline supply has given out. He always has kept a can of gasoline in an accessible place for such callers.

When a motorist calls at Martin's home late at night, Martin simply directs the person to the location of the gasoline supply and goes back to sleep. Over a period of ten years Martin has yet to accommodate a motorist who has failed to return the gasoline can and leave sufficient money to pay for the fuel obtained.

### A Big Order

**Millions Of Sandwiches Served At World's Fair This Year**

Patrons of the Chicago world's fair this year consumed 4,600,000 hot hamburger sandwiches, 2,000,000 hot dogs, 2,000,000 gallons of coffee, 775,000 bowls of chili con carne, 100,000 corn beef hash sandwiches, 7,000 hot tamales and 900,000 ham sandwiches.

In addition, at one restaurant operated by a packing company, 34,960,000 slices of bacon were served over the counter and 159,000 steak dinners were provided.

By Ellen Worth

**CONSERVATIVE TYPE DINNER DRESS OF HOLLYWOOD INFLUENCE WITH SILK LINES**

This charming black transparent velvet dinner dress gains "above the waist appeal" through its silver lame collar. And it carries around down the back too, accenting the deep décolletage. The long sleeves are banded in tailored cuffs of the silver lame.

Another scheme with powers of enchantment is sapphire blue crystal velvet with trim of crimson crystal velvet.

Style No. 887 is designed for sizes 24, 26, 28, 30, 32, 34, 36, 38 and 40 inches bust. Size 36 requires 3½ yards of 39-inch material with ½ yard of 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap copy carefully.

"Sinister-looking Individual (threateningly): 'Is yer 'usband at 'ome, Ma'am?'"

Resourceful Lady: "Well, if he has finished his revolver practice, he'll be playing in the back garden with our bloodhounds. Did you want to see him?"

—The Humorist, London.

### Great Health Resort

**Waters Of The Dead Sea Said To Have Rejuvenating Qualities**

The extraordinary vitalizing properties of the waters of the Dead Sea were referred to by Major T. G. Tulloch, R.A., in a lecture recently before the Royal Society of Arts.

"The water," said Major Tulloch, "is not only charged to the extent of twenty-five per cent. with salts having beneficial medicinal properties, but is also highly radio-active."

"The effect of a bath there is very remarkable, for it has an extraordinary rejuvenating effect, and although it is hardly credible, I have seen people emerge looking years younger than when they went in an hour earlier."

"Many business men come down every evening after their work for a swim, for they find that the sunbathing 'tonic' effect of the water strengthens them mentally and physically in a very short time."

The fact that the northern shores of the Dead Sea and its neighbors are so healthy is due apparently to a number of causes. The main reason is thought to be its great depth below sea level (the Dead Sea is 1,300 feet below the Mediterranean), and the climate there is thus unique, while there is sixty-five per cent. more oxygen in the air there than any other open place in the world.

The doctor was questioning the new nurse about her latest patient. "Have you kept a chart of his progress?" he inquired.

The nurse blushing replied, "No, but I can show you my diary."

Losses from forgeries now total more than \$250,000,000 annually.

### Some Alberta Products

**Coal, Petroleum and Timber Among Important Industries**

Alberta is famous for its wheat, livestock, and mountain scenery, but it has other resources which are the basis of a substantial and increasing industry. Total coal production in Alberta for the eight months ended August 31 this year was 2,574,436 tons, compared with 2,467,166 tons for the same period last year. The eight-month production of petroleum for this year was 852,228 bbls. compared with 832,454 bbls. in the eight-month period of 1933. Timber products for the 1933-34 fiscal year showed an improved condition over that for the 1932-33 year, the lumber production being 55,208,052 board feet compared with 52,756,467 board feet in the previous year. Other lines of timber products showed similar increases.

### New U.S. Industry

**Motor Magnet Growing Tung Trees To Produce Oil For Paints**

Henry Ford is the latest entrant in an infant enterprise that may bring the United States' southeast millions of dollars annually by breaking China's stronghold on tung oil production.

On his 80,000-acre plantation at Ways, Ga., near Savannah, the motor magnate has ordered planted 200 acres of tung trees. From the trees is taken oil indispensable in the manufacture of some paints, lacquers, varnishes and enamels. The paint industry, it is estimated needs \$100,000,000 a year either for tung oil or less satisfactory substitutes. Ford's industries use much of the oil imported.

## The SNAPSHOTS GUILD

ANIMAL PICTURES

Although this snap was made in a zoo, it has all the "feel" of reality, because the taker avoided the showing of bars or barriers.

Animals—from household pets to jungle giants—afford ideal snapshots. For animals don't pose; they are always entirely natural and, as a result, interesting. Next to birds, they are the finest "actors" in the world for the simple reason that they do not "act."

To get good pictures of any animal the first essential is patience. It is quite possible that the family dog will stand up obligingly for you on command, but in picturing all other animals you'll find it necessary to wait for the picture you want.

And this brings us to the question—what do you want in an animal picture?

Ten or fifteen years ago there was a great fad for picturing kittens in all sorts of outlandish poses. The poor little tykes were dressed up, propped up, and photographed as though they were puppets in a marionette show. To most people, however, pictures of animals as they really are have much more appeal. You will probably prefer to snap a kitten as it plays with a string of a dog wrestling with a big stick.

Domestic animals, of course, offer few real camera difficulties, for you get them to come where the light is right. Open shade, on a bright day, will be found best. As for shutter speed (if your camera is a "snap" type), you'll need 1/25th of a second or faster, to catch fleeting poses and expressions. Unless the light is exceptional, better work with the lens wide open.

To snap less controllable animals—squirrels, birds and such—you'll need greater patience and cunning. Much depends on background and on your distance from the subject. At more than ten feet, for example, a squirrel becomes almost invisible unless it is sharply revealed on a branch, with the sky for background. Obviously, you'll need to use a fast shutter; squirrels move too swiftly for slow snaps.

The zoo can be a happy hunting ground, too. In many cases, you'll be able to shoot through or over the bars of cages, obtaining clear, unobstructed snaps. In zoos where "natural" settings for the animals have been built, you can get pictures comparable to those that Martin Johnson and Frank Buck travel months to find.

Use a modern, color sensitive film. You'll need all the detail you can get and the utmost in color value rendering. Otherwise you'll find your picture of a cinnamon bear looking very much like one of a black bear.

JOHN VAN GUILDER

## A Co-Ordinated Health Program For Canada Being Urged By The Leaders Of Welfare Groups

A co-ordinated health programme for Canada, wherein present health machinery would work more smoothly under a comprehensive nationally organized effort to preserve health and prevent disease, was urged by preachers, physicians, provincial and civic officials, and leaders of welfare groups in a series of addresses under the auspices of the Canadian Social Hygiene Council in Toronto during the last two weeks.

Suggestions ranged from formation of "a national health council" to stimulate provincial programmes and correlate them with the federal department of health, to a general programme of health education by governments and independent health organizations. There were more than 50 speakers, including the Mayor of Toronto, Justices, judges and health directors of independent bodies. Organizations represented included the Canadian Red Cross Society, the National Council of Women, the Social Hygiene Council, city and provincial health departments, churches, independent welfare bodies and the Young Women's Christian Association.

It was contended by speakers that the value of health education had been proved by results of programmes directed to the prevention of venereal diseases, tuberculosis, diphtheria, typhoid fever, and so forth, and that Canada's daily sick list could be cut in half if present knowledge and equipment for disease prevention were made available to the public.

Premier Bennett was commended for placing national health before the forthcoming inter-provincial conference of premiers and support was urged to any move which might emerge from the conference towards broader health education.

More than 16,000 persons who heard the addresses, delivered during the showings of "Damaged Lives", a health educational film, endorsed petitions which were forwarded to Ottawa urging representatives at the conference to give national health the utmost consideration.

From an economic as well as a social standpoint health preservation was a national health problem. There are 21 million workdays lost annually through illness, which cost the nation for doctors' bills, hospitalization and lost working capacity more than a billion dollars. Also, it was pointed out, there is a relation between illness and indigency which burdened the taxpayer.

Educational programmes sponsored by the Canadian Social Hygiene Council had been of tremendous benefit in improving civic health. Mayor W. J. Stewart said. He credited the Council with having pioneered public interest in health throughout the Dominion, and said that no city could be prouder of any organization than Toronto was of the Council. Its leadership should be followed by a national movement along the same line, he said.

Canada spent annually \$311,000,000 in an attempt to cure illness, but only in its prevention. Dr. J. W. S. McCullough, Chief Health Inspector for Ontario, pointed out. It is equally well-known that education is the best method of stimulating interest in health.

Knowledge of disease prevention should not be "the prerogative of the few but the right of the many," stated Dr. J. T. Phair, Director of the Child Hygiene Division of the Ontario Department of Health. "Sound public health leadership from above" and "urging from below" alone would achieve successful distribution of health knowledge, said Dr. L. A. Pequegnat, Deputy Medical Officer of Health for Toronto.

Other physicians who spoke included Dr. R. S. Penicock, past president of the Toronto Academy of Medicine, who said the whole future of medicine lay in prevention; Dr. A. McCay of the Provincial Department of Health, who urged each citizen to assume individual responsibility for personal and national health; Dr. Gordon P. Jackson, Medical Officer of Health for Toronto; Dr. Geo. Port, Health Director for the University of Toronto, and Drs. Alan Brown and F. F. Tisdall, nationally known child specialists.

Women physicians and welfare workers who urged "a woman's crusade for health" included Dr. Mildred Newell of Edmonton, public health convener for the National Council of Women; Dr. Helen MacMurchy, O.B.E.; Mrs. Percival Foster, field secretary of the National Council of the Y.W.C.A.; Dr. Minerva Reid, Toronto school trustee; Mrs. W. R. R.

Jackson, president of the Silver Cross Women of the British Empire; Miss Edna Moore, chief public health nurse in the Child Hygiene Division of the Ontario Government; and Mrs. J. P. Hynes, president of the Local Council of Women.

A relationship existing between delinquency and ill health was stressed by Judge H. S. Mott of the Toronto Juvenile Court and Hon. Mr. Justice Riddell; and the economic aspect of illness as it affects labour was presented by Controller Jas. Simpson, vice-president of the Trades and Labour Congress of Canada.

Religious leaders who declared that morality was strengthened by health included Rev. R. B. Cochrane, national home mission secretary for the United Church of Canada, and Rabbi Maurice Eisendrath, one of the best known Jewish leaders in Canada. Dr. Cochrane declared that his experience in Western Canada had induced him to believe there was more need for governmental assistance in medical services to citizens than ever before.

### Holland For Bulbs

**Flower-Growing Industry Very Much Alive In That Country**

"Holland as a bulb and flower-growing country still is very much alive," declared Ernst H. Krelage, president of the General Dutch Bulb Growers' Society.

"Our foreign customers still buy as much as ever," Krelage said. "People all over the world these days consider that flowers are a necessity and not a luxury any more." Krelage has been the president of the society for many years. Their headquarters are at Haarlem where they have their own experimental gardens. Every bulb grower is compelled to be a member, so that they come under the strict supervision of the society. They have their own laboratory and no Dutch bulb is exported unless a certificate is obtained from the governmental institution for diseases in plants in Wageningen, stating that the bulbs are absolutely healthy.

"In the peak year, 1932," said Krelage, "the export had grown to 47,500,000 kilograms of bulbs, representing a value of \$12,700,000. In 1933 the export dropped to 42,500,000 kilograms, but the value increased."

### Advertising For Rain

**Downpour Cane Along Whether Due To Ad Or Not**

Indian rain wizards, aerial bombers and various other wonder workers have been claiming credit for the recent rainfall. The fourth estate should be quick to dismiss the honor list. Witness the quick results in Wisconsin, where the following want ad appeared in the Centuria Inter-County Leader:

Wanted—About 1 inch of rain for the coming week, and in the vicinity of Trade River and the rest of the country. Address Herb Erickson, Trade River, Wis. Five hours after the paper went to press a half-inch of rain fell at Trade River, as well as over all northwest Wisconsin. And more rain came a few days later.

From which we quite unashamedly draw two conclusions: 1. The power of the press has been vastly underestimated. 2. It pays to advertise.—St. Louis Post-Dispatch.

### Railway Fog

When does fog become a "railway fog"? An official of the London and North Eastern Railway has explained that it becomes "official" the moment a signalman cannot see a fixed signal 200 yards away. The signalman informs his station-master, and the station-master summons his fog-men to lay detonators as long as the fog lasts. For fog services there are special timetables which reduce the number of trains by a quarter and lowers their speed.—C.N. Railways Magazine.

### Might Try New Way

He was taking his girl friend to the opera for the first time, but he thought it would be the correct thing to do to act like an every-week attendant.

"Have you ever tried listening to the opera with your eyes shut?" he asked his fair companion, as a particularly fine aria was sung.

A voice from over his shoulder boomed out: "Young man, have you ever tried listening to the opera with your mouth shut?"

Fingerprints are being sent by telegraph in France

WORLD HAPPENINGS  
BRIEFLY TOLD

Hon. Herbert Marler, Canadian minister to Japan, and Mrs. Marler, have returned to Tokyo.

Cambridge University's new 24-storey library building was inaugurated with a ceremony presided over by the king.

Approval by the governor-in-council of a scheme for the regulation of the marketing of dry salt herring and dry salt salmon produced in British Columbia was announced.

Ottawa will become the headquarters in Canada of the order of St. John with establishment there of a commandery, Dr. Charles Copp, Toronto, commissioner of the order in Canada, announced.

In a letter sent to Prime Minister R. B. Bennett, the Toronto central council of ratepayers' associations urges amalgamation of parliaments or a federation of parliament to combat present conditions.

Protesting the cut in the relief allowance under the federal "dump sum" policy, the city council of Edmonton passed a resolution demanding that the Dominion government assume its full responsibility in handling the problem.

Henry Wallace, U.S. secretary of agriculture, asserted the United States must look to "increase purchasing power" rather than to lower prices on cotton if it is to maintain markets abroad for its usual annual export of \$800,000 bales.

Lack of ready cash to finance the debt and unwillingness of bankers to advance further loans may force the Montreal Island municipality of Verdun to abandon all aid to its 2,339 unemployed families and leave about 10,000 persons facing starvation.

## Travelled By Plane

Apparently unconcerned with his journey, Toto Tettio, 265-pound baby elephant, was taken by airplane to St. Louis by Mr. and Mrs. Martin Johnson and turned over to the St. Louis Municipal Zoo. The Johnsons, noted big game hunters, flew the animal there in their own plane from New York.

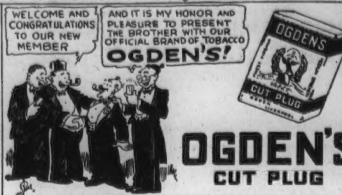

New York's 4,000 fur dealers manufacturers and importers are concentrated in a three-block section of the city.

The village of Cuddington, Surrey, England, is more than 1,250 years old.

## Recipes For This Week

(By Betty Barclay)

## CORN FLAKE MACAROONS

2 egg whites  
1 cup sugar  
2 cups corn flakes  
1/4 cup nuts  
1 cup coconut  
1/2 teaspoon vanilla extract

Beat egg whites until they are stiff enough to hold their shape, but not until they lose their shiny appearance. Fold in sugar carefully. Fold in corn flakes, nuts and coconut. Add vanilla. Drop on a well greased baking sheet. Bake in a moderate oven (350 degrees F) about 15 to 20 minutes. Remove pans from oven, place on damp towel and remove macaroons immediately with a spatula or sharp knife. If macaroons become hardened to pan, they may be put in the oven for a few minutes to soften. A standard measuring tablespoon which has a round bowl may be used for shaping the macaroons.

## CHICKEN AND RICE SOUFFLE

1 1/2 cups chicken, diced  
1 cup cooked rice  
1/2 cup chicken gravy  
2 eggs, beaten

Mix chicken and rice. Season with salt and moisten well with gravy, add well beaten yolks and carefully fold in the beaten whites. Bake in a moderate oven until golden brown on top.

During the past winter, Kentucky commissioned more than 50 new "Colonels", bringing the total of honorary aids to the governor of that state commissioned in the past 10 years to 3,226.

Although not in the etiquette book, one must learn how to bow to the inevitable.

## Efforts Met With Success

Boy Paralyzed Helped By Two Teachers Learned To Speak

Voluntary instruction by two Omaha speech-education teachers has enabled Billy Coleman, nine-year-old paralytic to speak for the first time. Stricken with infantile paralysis when he was 11 months old, Billy was unable to get about by himself and his handicap was made greater by his inability to speak.

Although he received the finest treatment at the municipal hospital, his vocal sense did not respond to treatment until he was placed in the care of Miss Alice Lillegren, speech education supervisor of the Omaha public schools, and Miss Elba Jackson of the speech education department.

When Billy first came to the attention of the teachers he was unable to move his tongue, lower his jaw or close his lips. He was deficient in 37 of the 40 sounds used in normal speech.

Billy's first lesson was to learn to say "ah", according to Miss Lillegren. She let Billy touch her throat, face and mouth as she enunciated the simple syllable. Since his hearing was normal she also instructed him in the position of the tongue in making the sound.

Through his grim determination to learn to speak and his power of concentration, which Miss Lillegren said was unequalled, Billy now speaks almost normally.

A BECOMING SMART BOOBY  
THAT'S DIFFERENT LOOING  
WITH ITS DROP-SHOULDER-  
LINE—SOFT TIED NECK-  
LINE

A smart blouse can add such a gay dash of brilliancy to the most simple suit. And incidentally, the blouse without a doubt is a favorite this season worn with separate skirts. Emerald green duvetyne is chosen for this attractive blouse with drop-shoulder line and sleeves that have a comfortable fit.

Another fascinating idea is yellow macarons. Wool dalls in bright plain colors, cotton, silk and loud plaids of the kind are darling suggestions for the school and college girl. For more formal wear, choose plain puffed, herringbone, ribbed or metal short satin, taffeta, metal lame, brocade velvet, etc.

Style No. 901 is designed for sizes 14, 16, 18 years, 30, 32 and 40 inches bust. Size 16 requires 2 1/2 yards of 38-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Little Journeys In Science

DYES

(By Gordon H. Guest, M.A.)

Recently a French silk manufacturer displayed eighty-six different shades of the color green, showing to what perfection the art of dyeing has been brought. Thought to have originated in India many centuries ago, dyeing was at first confined to the production of just three colors, red, obtained from the madder plant; blue from indigo, and purple from shellfish. These early dyes were of fine quality and are still to be seen in the mummy cloths in archaic collections. These cloths glow with rich colorings of purple and red.

In the city of Florence, Italy, a method of preparing purple dye from certain lichens, was discovered in the thirteenth century, and in 1472 the first dye company was incorporated in London. It was not, however, until the eighteenth century, when scientists interested themselves in the perfection of dyeing processes, that the industry became the important one that it is to-day. Coal-tar products were introduced into the process in 1856 by a young British chemist, William Henry Perkins. Perkins was working with aniline, a substance taken from coal tar, in an effort to find coloring. Instead, he discovered amazing qualities of certain aniline compounds, which led to a broader field, revealing dye properties in a large number of coal tar products. His work, which resulted in cheaper and more versatile dyes, brought him a fortune and a high school, while industry was further revolutionized by the utilization of coal tar, which had hitherto been almost useless.

Artificial dyes are superior to those found in nature, because of their much greater variety and adaptability, qualities which are continually being further developed in chemical laboratories.

## Restoring Life

Motion Picture Is Written About California Scientist

Dr. Robert E. Connelley's feat of restoring life processes to a dog which had been put to death chemically is to be used as the climax of a motion picture written about the life of the Berkeley, Calif., scientist.

Carl Laemmle, president of a film company, said photographic and sound recording made at the time the experiment was performed would be used in the picture, to be called "Life Returns."

OFF COLOUR?  
HOW IS YOUR LIVER?

Wake up your Liver Bile—Without Calomel

Your liver's a very small organ, but it certainly can get your digestive and eliminative organs out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels. You won't completely enjoy such a condition by taking salts, oil, mineral water, laxative candy or chewing gum, or coughing. When they're moved your bowels they're through—and you're a liver stimulant.

Cutter's Little Liver Pills will soon bring back the bile into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Heed instructions. See it all described.

A saxophone eighteen feet long is reported to be in use somewhere along the Pacific Coast of the United States. With equipment of that sort along the ocean shores there is hardly need for defenseless coast artillery.

Hubby—I admit, dear, I didn't get home at five o'clock.

Wife—I know it!

Hubby—That's why I admit it.

## Too Much Uric Acid

is a very common cause of Rheumatism, Sciatica, Lumbago, Draggled kidneys may have an excessive amount of uric acid to accumulate. Take GIN Pills for relief while they are assisting your kidneys to function normally.

## SUNDAY SCHOOL LESSON

NOVEMBER 4

## CHRISTIAN GROWTH

Golden text: "But grow in the grace and knowledge of our Lord and Saviour Jesus Christ." 2 Peter 3:18.

Devotional reading: Proverbs 4:10-19.

## Explanations And Comments

How Jesus Grew, Luke 2:42-52. For thirty years the life of Jesus was uneventful. He lived in Nazareth among the hills of Lower Galilee, and wrought at Joseph's bench as a carpenter. The only event in all that time that has been recorded is his going to Jerusalem, eighty miles southward, to keep the Passover with Mary and Joseph. The story of that Passover we have studied four times in the last six years, and explanations are not needed.

The account closes with these words: "And Jesus advanced in wisdom and stature, and in favor with God and men. God chose to send his Son into the world as a helpless Babe to attain a perfect Manhood through all the natural stages of human growth, physical, mental, and spiritual. He was larger and wiser at twelve than at two, and at thirty than at twelve; he had a glimpse of his high calling at twelve which he did not have at two, and a realization of it at thirty which he did not have at twelve."

Exhortation to Growth in Righteousness, 2 Peter 1:5-8. God hath granted unto us all things that pertain unto life and godliness, through the knowledge of him that called us by his own glory and virtue; whereby he hath granted unto us his precious and exceeding great promises; that through them ye may become partakers of the divine nature: these are words that precede our text. Now we read that for this very cause, because God has granted all this, there is a duty that precedes our text. What shall I render unto Jehovah for all his benefits toward me? The sainted questions. There is much that I must render. They call for diligent endeavor on my part; first, in my faith to supply virtue. The Authorized Version exhorts us to add one virtue to another, but the Greek means "to do one's own virtue or the exercise of another." Each grace here mentioned is contained in the next, "as a series of Chinese boxes." "As we address ourselves to the acquisition of one grace, it becomes a source out of which we can develop another. Everything in Christian experience is orderly and progressive. Each quality does a kind of osmosis in which its successor is nourished." (John Gardner).

## Jack Miner

By Jack Herity Of Belleville, Ontario

He must pack a heap of pleasure Underneath his shaggy dome; Now it's getting on to autumn And his birds are coming home. It must stir up all his senses In a kind of inside grin. When he gazes down the Southway And sees his squadrons winging in.

Must be like a mighty merchant, When his ships come one by one, To the harbor where there's quiet And retreat from pirate's gun.

Pirates! That's the right name for us, Oh, my guilty, name as you, For I've often sent them tumbling, Broken, tattered, from the blue.

I have lain for hours listening For that throbbing cry, And to see an old commander Lead his flock across the sky.

But—well there above the fireplace You can see my guns to-day, And they're mighty ornamental. Since I went down Kingsville way.

Angels used to be right common, If I believe what I've read say; But a scientist said that you can't see a saint.

We don't have such things to-day. Still I guess if we could see things In a sort of spirit light, We would find Jack Miner's raiment Is a robe of shining white.

Post office boxes are carried on the backs of all street cars in Stockholm, Sweden; when the car passes the post office a clerk removes the box and replaces it with an empty one.

Only persons who are teetotalers, non-smokers and vegetarians will be allowed to settle in a new town to be built near Prague, Czechoslovakia.

## Hospital For Unemployed

Alberta Relief Commission Opening Up Home For Care Of Ailing People

A modern hotel, formerly used as a convalescent hospital for returned soldiers, has been purchased by the Alberta relief commission for the care of sick and aged unemployed single men. It was announced at Calgary.

Located at Ogden, six miles from Calgary, it will be operated as a hospital and home for the sick and aged unemployed; and when it is opened, about November 1, will house between 150 and 200 men. The purchase price was not disclosed.

Hon. H. W. Allen, who inspected the building, stated it would be used not only for Calgary cases but for sick jobless men from other parts of the province.

A Law Every  
Mother Should  
Know and Observe

Never Give Your Child An Unknown Remedy without Asking Your Doctor First

According to any doctor you ask, the only safe way is never to give your child a remedy you don't know all about, without asking him first.

When it comes to "milk of magnesia," that you know everywhere, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—always say Phillips' when you buy. And, for your own peace of mind, see that your child gets this—the finest men know. Made in Canada.

## ACTION NEEDED TO AID SITUATION IN DROUTH AREAS

Winnipeg.—A plea directed to every corner of the Dominion for aid in rehabilitating the drouth areas in Western Canada has gone forth from Premier John Bracken of Manitoba.

Visualizing the rain-parched and dust-driven waste was a spectacle replete with crop failure, food shortage and human suffering that should be eliminated from the agricultural panorama of Canada, the Manitoba premier appealed to provincial premiers to institute a vigorous campaign to bring the problem Dominion-wide attention.

Speaking to the Canadian Club here, Mr. Bracken first told of the critical situation he had found while investigating the drouth areas. Crop failures in large areas of Saskatchewan, in parts of southeastern Alberta and in southwestern Manitoba had played havoc with the agricultural and, consequently, the social fabrics of those areas.

Relief money from municipal, provincial and federal coffers had been expended. But relief money, he contended, did not remedy the situation. Drouths would recur in cycles and unless rehabilitative measures were taken their recurrence would take on more aggravated forms.

Upon the whole Dominion lay the responsibility of attacking the question.

Mr. Bracken pleaded for reclamation of the drouth areas, rehabilitation of the farms, a conservation plan over the entire prairies and sound development of all resources.

"The problem has now assumed proportions of national scope," Mr. Bracken declared. What is needed is:

"The offer by provinces of services of such technical men and departments, without charge, as can be utilized in prosecution of such a major project;

"Appointment by the Dominion of a co-ordinating body to correlate efforts being made in a variety of directions by many individuals, both in and out of the public service, and by many departments both of governments and universities.

"Provision by the Dominion for the necessary additional finances to ensure successful carrying out of a scheme, well-balanced program over the next 10 years;

"Active and sympathetic and generous co-operation of individuals, communities, railways and governments in a joint effort to solve a major problem."

## Want Wage Rate Restored

### Canadian Railway Running Trades Advance Arguments

Montreal.—A plea there was no reason for Canadian railways not to follow the lead of United States lines and return to basic wage rates by April 1, 1935, was advanced here by Canadian railway running trades spokesmen at the continuation of their conferences with Canadian Pacific and Canadian National officials, it was learned.

Heads of the Canadian railway running trades represent 35,000 men in their own unions and 65,000 in other sections of rail labor.

Increase of car loadings was understood to be another reason advanced by the men that the time had come for restoration of former wage schedules.

### Debaters Start Tour

Halifax.—Opening a debating tour which will take them across Canada, two English undergraduates, Robertson Christie of Oxford and Leslie Jackson of Cambridge defeated Dalhousie University when they upheld the affirmative on the subject: "Resolved that this house deprecates the rise of Fascism."

### Would Build For Defence

Washington.—Japan is preparing to demand an agreement under which the three leading naval powers would build no more "offensive" vessels. This became known in a charge of murder source as details of the Japanese position at the naval conversations in London were disclosed.

### Trial Starts In January

Flemington, N.J.—Bruno Richard Hauptmann entered a personal plea of not guilty to a charge of murdering the kidnapped Lindbergh baby, and Supreme Court Justice Thomas E. Trenchard fixed January 2, 1935, as the date for trial.

W. N. U. 2070

## King George Sends Approval

### Praises Work In Canada In Spreading Ideals Of League

Ottawa.—Warm approval by the King of the second national study project of the League of Nations Society in Canada was expressed in a cablegram received from His Majesty by Hon. Ernest Lapointe, president of the society.

"I have learned with pleasure and approval of the work of the League of Nations Society in Canada in spreading a knowledge of the ideals and work of the League of Nations," said His Majesty. "It is vitally necessary for the promotion of peace and co-operation between peoples that public opinion in all countries should thoroughly understand and appreciate the activities of the league in the active international action, peace and good order in the world. The peoples of the British Empire have borne and will continue to bear a heavy share of this work and I wish every success to the League of Nations Society in Canada in the execution of their plans for the coming winter."

## For Naval Equality

### Japanese Present Their Claim To U.S. Representatives

London.—The Japanese presented their claim for naval equality to representatives of the United States, as they had done in meetings with the British. No action was taken and no official statements were issued, but it seemed obvious that a long and knotty discussion faced the representatives of the world's three leading naval powers.

British and Americans feel that the existing treaties already contain sufficient guarantees for equality in security. Japan would sweep away the existing treaties and replace them with an entirely new structure. In a nutshell, Japan is firm in its determination to remove the existing ratio basis, on which naval categories of Britain, the United States and Japan are fixed on a 5-5-3 ratio respectively. If the other powers will not join her in abrogating the Washington treaty, then she will abrogate it unilaterally—Independently.

## United Farm Women

### Mrs. Goodale Heads Organization In Manitoba

Brandon, Man.—Mrs. M. J. Goodale, Portage la Prairie, was re-elected president of the United Farm Women of Manitoba at its annual convention here. Mrs. E. L. Johnson, Arbor, was re-elected vice-president.

Discussions on rationalization, sterilization of mentally defective persons and problems of the farm occupied the delegates. Resolutions of the organization will be submitted to the general session of the United Farmers of Manitoba for consideration.

### Regulate Potato Marketing

Ottawa.—A decision to apply for the setting up of a scheme under the National Products Marketing Act to regulate the marketing of potatoes in eastern Canada was practically reached at a session of the potato conference, representing growers, dealers and government. Ontario, Quebec, Nova Scotia, Prince Edward Island and New Brunswick. The conference is attempting to work out plans of orderly marketing for the present bumper potato crop in order to ensure the farmers as good as possible a return.

### Remembrance Day

Ottawa.—The "great silence" between 11 a.m. and 11:02 a.m. on November 11 will be observed in Canada, and the government has issued instructions to provincial and municipal authorities to arrange for suspension of all vehicular traffic during these two minutes. Railway and water transport will not be suspended.

### Defends Beauty Operations

Chicago.—A defence of the use of the surgeon's knife for the sake of beauty alone when the psychological benefit to be derived by the patient is great, was voiced by Sir Harold Gillis, noted London surgeon. He pleaded for recognition of "esthetic surgery" as "the Cinderella of surgery."

### Plan To Tattoo Soldiers

Washington.—Every United States soldier would be tattooed, under a plan now before the war department. As a means of identifying dead and wounded, tattooing is advocated by Lieutenant C. L. Whittle of Fort Ontario, N.Y. In the Infantry Journal, official publication of the Infantry Association.

## Drouth In China

### Damage Is Expected To Reach Amount Exceeding \$1,200,000,000

Shanghai, China.—The losses to the Chinese farmers and peasants occasioned by the prolonged drouth and record heat wave of the past spring and summer are expected to exceed \$1,200,000,000, according to a report issued by the national famine relief commission, which is based on reports received from the stricken districts.

In the 10 provinces, 263 districts have sent in reports declaring a total of approximately 26,700,000 acres of cultivated lands have been affected by the drouth.

When all surveys are completed it is expected the drouth losses will reach a more appalling total than even the very pessimistic estimate of the national famine relief commission.

A survey conducted by the department of agricultural economics of the national agricultural research bureau of the ministry of industries reveals the damage caused by the drouth in the two provinces of Kiangsu and Chekiang alone is in excess of \$528,800,000. The area affected in these two provinces is only about one-third of the total area of the 10 provinces hit by the drouth.

## Reduce Liquor Prices

### Manitoba Commission Faced With Competition From Bootleggers

Winnipeg.—As intensive police drive on bootleggers is under way at the Manitoba government liquor control commission, faced with fierce competition from this source, announced reduced prices on Canadian gin sold in liquor stores.

The commission announced Canadian-made gin would be reduced 35 cents per 26-ounce bottle to \$2.50, and 40-ounce size to \$3.80, a cut of 50 cents. Small variations in price according to quality will be set.

## CODES FOR LABOR TO BE DISCUSSED AT CONFERENCE

Montreal.—Governmental codes for industry in Canada patterned after the N.R.A. codes of the United States insofar as minimum wages and hours of labor are concerned will be discussed at the forthcoming conference of representatives of all the provincial governments at Toronto, the Gazette states.

"Hon. C. J. Arcand, Quebec minister of labor, will attend," the paper continues, and it may be that he will challenge the worth of governmental codes fixing minimum wages and hours of labor for male workers as against that of juridical extension of collective labor agreements, as existing at present in this province.

"In other words, it may be held that so far as the fixing of labor conditions for men, it is better that employers and employees be permitted to come to an agreement among themselves, and juridically extend these agreements, than have government interference."

This procedure, the Gazette states, was held by Quebec authorities to be a better solution of present-day labor problems than that of governmental interference.

## NEW ZEALAND'S GOVERNOR-GENERAL AT HOME

Here is a picture of Viscount and Viscountess Galway with their children in the grounds of their home, Serby Hall, Bawtry, Yorkshire. The King has approved the appointment of Viscount Galway to be Governor-General of New Zealand in succession to Lord Bledisloe, whose term of office expires shortly.

## BRITAIN'S ENVOY

Sir Frederick Leith-Ross, Chief Economic Adviser to the British Government, who heads the delegation which is in Berlin initiating discussions on the commercial and financial relations of the two countries, as affected by the new German machinery for the control of imports and the allocation of foreign exchange.

## Win Air Derby

### England's Brilliant Airmen Finished First In Handicap As Well As Speed

Melbourne, Australia.—An unofficial check indicated England's brilliant airmen, C. W. A. Scott and T. Campbell Black, finished first in the handicap as well as the speed race in the England-Melbourne derby. Their official time was 70 hours, 59 minutes, 50 seconds.

But the Dutch entry, which came in 19 hours and 18 minutes behind Scott and Black, and two hours and 42 minutes ahead of the American team of Col. Roscoe Turner and Clyde Pangborn, stands an excellent chance of getting the handicap first prize of \$10,000.

Under the rules for the derby a pilot cannot win prizes in both races, but must choose between them.

Should Panamerica and Moll get the \$10,000 handicap prize, the second prize of \$7,500 in the speed race would go to Turner and Pangborn. At any rate the Americans are assured of the \$2,500 third prize in the speed race.

## Purchase Land In Alberta

### Two Colonies Of Hutterites Have Settled Near Lethbridge

Lethbridge, Alta.—Purchase of 11,000 acres of farm lands in the Chin district, near Lethbridge, at a cost of \$110,000 by the Hutterite brethren was confirmed. Two colonies of Hutterites will occupy the land of which 5,500 acres are ready for crop next spring. One block was formerly owned by R. C. Harvey, Lethbridge sheep rancher. The other was sold by the Canadian Pacific Railway lands department.

### Wins Provincial Honors

Edmonton.—Junior club team from Lacombe and Olds won provincial honors in stock judging competitions here and will get free trips to the Royal Winter Fair at Toronto, where they will represent Alberta in the Dominion finals. While Thomson and Walter Dunkley of Olds won the Junior Dairy Club class event, Henry Magilton and Edward Chessor of Lacombe were victors in the Beef Club finals.

## Flight Was A Success

### Trip Into Stratosphere Quite Satisfactory Stated Mrs. Picard

Cadiz, Ohio.—The stratosphere flight of the Jean Picards came to an end in a triumph. The bag of their balloon was badly torn, but the gondola and valuable instruments were undamaged and the Picards themselves were unhurt.

The Picards, saying they believed the purpose of their flight had been accomplished, brought the huge bag down after a flight that started from Detroit and carried them an estimated 10 miles into the air.

"The flight was a success," said Mrs. Picard soon after she climbed from the gondola which settled amid trees near an old logging road on the John Fulton farm, four and one-half miles southwest of here.

Glen Coppe, a farmer, made a valiant attempt to halt the balloon as it drifted slowly a short distance above the ground, its ropes dragging.

He grabbed a rope and attempted to tie it to a tractor. The floating balloon pulled the rope from his hands and the balloon then scraped the top of a 75-foot elm, the branches tearing the bag badly but not damaging the gondola. The landing, while rough, merely shook up the Swiss scientist and his wife.

## Community Chest Campaign

### Relief For Families That Might Otherwise Be Destroyed

Vancouver.—"There are families today who are in desperate financial straits," declared in a public address in behalf of Community Chest campaigns now in progress in various cities of Canada. "In their homes the health of children is being imperiled."

"Now," Mr. McGee continued, "whether this condition arises from lack of income or from other cause, wise private social service not forced upon the family by the government can often bring relief that means the rehabilitation of a family that might otherwise be destroyed."

## Taxes On Range Lands

### New Base For Levy Urged Before Alberta Board

Calgary.—A plea that taxes on range lands be levied according to productive, rather than fictitious value of land was made by Jack Byers, of the Western Stockgrowers' association, who has been before the Alberta tax inquiry board which was holding sessions in Calgary.

Mr. Byers also urged that arrears of taxes be worked out in forms of range improvements which would promote more efficient land utilization, and that there be a flat rate of taxation that stockmen can afford to pay, with proper provision for collection.

## TO ESTABLISH AN OPEN LONDON GRAIN AGENCY

Winnipeg.—Establishment of a grain agency at London will be entirely independent of Canadian wheat pools and other export agencies. David L. Smith, former foreign representative of the pools' central selling agency, said here. He will sail for England early in November.

Mr. Smith will operate as an independent private trader. At London he will establish a sample market where Canadian grains can be inspected and their qualities discussed with European buyers. Through this medium he is hopeful of establishing a contact that will assist materially in the sale of Canadian wheat and other grains abroad.

In England Mr. Smith acts as the accredited representative of a number of Canadian export houses, including the Alberta and Saskatchewan wheat pools. He believed earlier report which said the agency had been decided upon as a joint effort of several Canadian export houses and the two pools, carried a wrong impression. He will act as salesman on his own account.

Calgary.—Establishment of David L. Smith, of Winnipeg, as a grain agent in London to increase sales of Canadian grains will be entirely independent of the Alberta wheat pool, R. D. Purdy, manager of the pool, said. Anything Mr. Smith may accomplish will be separate from the pools' efforts in the export field.

"Mr. Smith is going to London as a salesman on his own account. I understand," Mr. Purdy said. "If he succeeds he may be able to do some business with us. But I would like to make it clear that he is entirely independent of the Alberta wheat pool."

## PRICE SPREADS COMMISSION TO RESUME WORK

Ottawa.—Fish, livestock marketing and packing, canning, milling and baking, textile and agriculture implement industries will be investigated by the price spreads and mass buying, Commission Minister of agriculture.

Trade and Commerce H. H. Stevens. Further evidence, in addition, will be submitted on the effect of mass buying by large-scale merchandising establishments. Government auditors will submit their report relative to chain store merchandising in Canada, and evidence will be submitted as to the position of the consumer in relation to various questions that have arisen.

The first subject to be considered by the commission will be the marketing of fish. A brief report on this subject was presented to the parliamentary committee last June by L. W. Fraser, of Halifax, as a result of a survey made by him. Arrangements have now been made to secure further evidence on this subject from witnesses representing various phases of the fishing industry.

It is expected that evidence on the following questions also will be submitted to the commission:

1 Livestock marketing and the packing industry. This was dealt with by the parliamentary committee but additional information has been secured and will be presented.

2 Canned food industry. A report will be submitted by the auditors which will, it is hoped, throw light on the economic and financial structure of the industry and its relation to both consumers and producers.

3 Milling and baking industries. A complete study of these industries has been made and will be presented, special attention having been given to the development of the mill-controlled bakeries.

4 Textile and agricultural implement industries. The auditors will submit reports on these industries which will present a picture of their financial structure and labor and wage conditions.

5 Further evidence will be submitted as to the effect of mass buying on the part of large-scale merchandising establishments.

6 A complete report has been made by the auditors in connection with chain store merchandising in Canada, and will be presented to the commission.

7 Finally, it is anticipated that evidence will be submitted as to the position of the consumer in relation to the various questions that have arisen, with special reference to the desirability of consumer standards and consumer protection against fraudulent and unethical merchandising.

## Trail Of Death

### Maniac In Quebec Runs Amuck And Kills Six People

Quebec.—Bodies of four persons, a man and three women, were at the morgue here, victims of a maniac, who, while on his way to the hospital, ran St. Theresa, Que., for the bodies of two men whom J. Rosaire Bilodeau, 45, admitted having killed.

The trail of death, Bilodeau stated, began when he drove two of his cousins, Gaston Guayvin, 30, and Fernan Guayvin, 18, into the woods. Leaving his car he led them into the woods, killing them.

Then he returned to Quebec and took his two sisters, Marie Bilodeau, 63, and Rosalie Bilodeau, 62, and Yvette Guayvin, 21, his niece, to another point in the woods. They also were shot.

Bilodeau, a former postal employee, then burst in to the Quebec post office, slaying Octave Fiset, divisional superintendent of the Quebec postal service, and injuring Postmaster J. G. L. Morin critically and Moise Jolicoeur, senior mail clerk, seriously. Bilodeau, after being overpowered in the post office, was taken to police headquarters, where under questioning he told police of five additional slayings. Police immediately took him to St. Theresa du Beausport, where he led them to the bodies of the three women, his two sisters and Yvette Guayvin.

### Praise For Ferguson

Montreal.—Admiration for the vigor in which Hon. G. Howard Ferguson, Canadian high commissioner in London, is pressing Canada's case for a larger share of the lumber market in Great Britain was expressed by C. E. Wright, head of a large London timber firm, who arrived here in the liner Ascania.

## State May Control Television

New Industry Likely To Be Under British Broadcasting Corporation

The British Broadcasting Corporation is likely to be given control of television.

Some time ago the postmaster-general set up a royal commission, under the chairmanship of Lord Selsdon, to inquire into the development of the industry, and the steps necessary to regulate it.

Although that report will not be presented for some months yet, it is clear that a state monopoly for television will be introduced.

Informed quarters believe that the B.B.C. will become responsible for the stations and programs, leaving the private firms to manufacture and sell the sets.

The commission is also being influenced in favor of a state-controlled system by military considerations.

Television is likely to play a very important part in any future war. It will enable the military and air force intelligently to watch the movement of enemy troops.

But the uncertainty regarding the report is hampering private firms now producing sets.

These pioneers have spent thousands of pounds on research and have already put Britain in the forefront of the world in this revolutionary development.

If this initial advantage is to be maintained it is necessary that the commission should report without delay.

### Makes Lengthy List

Names Of Many People Sound Same

We suggest that the Smiths, Smyths, Schmidts, and the Johnstones, Johnsons, Johnsons get together like the Jones boys and decide upon a uniform way to spell their name—Petrolia Advertiser-Topic.

And while the meeting was being called would it not be as well as the Stratford Beacon-Herald to send word to McLeans and the MacLeans asking them to attend and bring with them the Aitchisons and the Aitchison. If there were more the Aikens and Aikens might like to come and then Allens and Allans should be present. Mr. Andrews and Mr. Andrews should be there, so should Mr. Bailey and Mr. Baillie, likewise Mr. Beagly and Mr. Beattie.

It might help matters were Mr. Bexon and Mr. Bexton to be given seats at the conference. If Mr. Jeffrey and Mr. Jeffrey and Mr. Jeffries could be induced to attend it might simplify matters, and Mr. Connor might call and ask if Mr. Connor would care to accompany him. If the seating capacity had not been exhausted Mr. Davidson and Mr. Davidson should go and on their way pick up Mr. Davis and Mr. Davies, and we would like to see Mr. Davis and Mr. Gillies settle their differences and then give aid to Mr. Harvie and Mr. Harvey.

If the list were extended it would be possible to bring together a great company of folk whose names sound much the same but who spell them differently.

### May Use Bay Route

To Ship Saskatchewan Salt Lake To Eastern Canada

There is a possibility that the Hudson Bay route may enjoy some coastwise business through shipment of Saskatchewan salt lake to eastern Canada, according to B. M. "Barney" Stitt, M.P. for Churchill.

The local member has received a communication from A. E. Fortington, commercial intelligence service, Ottawa, which points out that the Saskatchewan salt lake may be used in the paper industry in the east, and could be shipped via Churchill to Three Rivers, Quebec.

It is also said that supplies of salt for prairie uses are shipped from Malgash, N.S., and that the department in Ottawa, is making an effort to have this product as well as the salt cake moved by coastwise steamers.

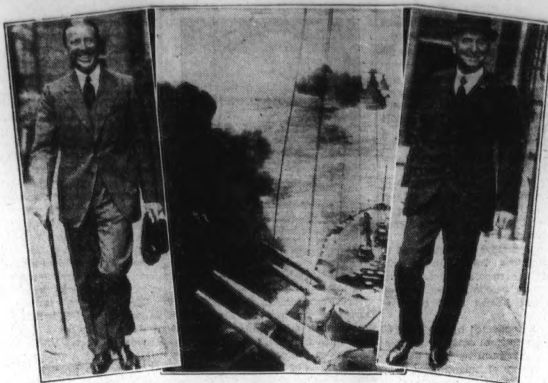

The communication adds that if the salt cake shipments are started via the northern route, it will be necessary to erect a silo for storage at Churchill, in order to protect the product from dampness. Loading would probably be accomplished by auction drive power.

He: "Do you believe kissing is unhealthy?"  
She: "I couldn't say—I've never."  
He: "You've never been kissed?"  
She: "I've never been sick."

China leads the world in population; 444,011,000 people live there.

W. N. U. 2070

## GREAT BRITAIN FIGHTS FOR THE NAVAL PACT

The Mother Country wants to continue the basic principles of the Washington and London naval treaties and the British delegates have told Japan's officials that Britain stands with the United States, France and Italy. Japan wants equality and seeks limitation on the global tonnage basis. Above, left and right, are two of Britain's delegates to the naval conference, Sir Bolton Eyres-Monsell, First Lord of the Admiralty, and Sir John Simon, Foreign Minister, while, centre, is a view of part of the Home Fleet firing broadsides from their 15-inch guns.

### Typical Grasshopper Egg Beds

Farmers Should Become Familiar With Habits Of Hoppers

Travelers along the market roads in Manitoba may observe several patches of ground picked out by white stakes. These stakes have been placed in position by members of the staff of the Dominion Entomological Laboratory at Brandon during their autumn survey and mark typical grasshopper egg beds. The idea underlying this is to familiarize farmers with what grasshopper egg beds look like and the places where the beds are likely to occur. If the over-crowded earth to a depth of about an inch on the soil near the stake they will find grasshopper eggs in abundance. The eggs are yellowish, enclosed in black pods about half an inch long. When looked for on the farm, the eggs will be discovered in similar places. The roadside grasshopper lays its eggs only in definite egg beds in soil along the road allowances, headlands, and pastures, and not generally over the fields. Egg beds are easiest to see now in the fall before the grass has grown after late rains. If the farmer can locate these areas he will be in a much better position to poison the beds in the spring before the young grasshoppers hatch when the popular begins to show green and early poisoning is the most effective.

### Had Counter Claim

Restaurant Keeper Met His Match In Lawyer Patron

A few nights ago a K.C. was dining out with his wife at a smart West End restaurant in London. The lawyer, after attentively scrutinizing it called for the manager. He challenged one item in particular, "What," he asked, "is this 5s. for?" The manager replied that it was for fruit, "but we did not have any fruit," protested the lawyer. "Well, sir," naively responded the manager, "it was there if you cared to have it."

The K.C. pondered this point for just two seconds, and then gracefully conceded it, but mentioned that he had a counter claim against the manager for precisely the same amount. The manager expressed his polite amazement as to what this item might be. "For kissing my wife," replied the subtle limb of the law. "You know, sir," was the indignant reply, "that I did nothing of the sort." "No," said the K.C. genially, "but she was there."

### Quintuplets Spoiled

The trouble with the Dionne quintuplets is that they are spoiled. Dr. Dafoe, their physician, made the announcement some time ago. Dr. Dafoe says the babies cry in unison, pause a moment to listen for approaching footsteps and, if they hear none, start again. He says he and the nurses are going to get stern about it, and stop all petting of the infants, who are now four months old.

They had grown wealthy suddenly and had purchased a farm, complete with hens, cows and pigs. Said a visitor one day:  
"Do your hens lay eggs?"  
"Oh, they can," was the lofty reply, "but in our position they don't have to."

Street cars in Milan, Italy, now carry nearly 1,000,000 passengers a day.

### Chinese Shrine Made Modern

'Phone Wires To Hill-Top Temple Considered Sacrilege

For well over two thousand years, Mount Taishan in Shantung province has been a sacred spot to which thousands of pilgrims have gone from all over China. It is particularly famous for the nearby shrine to the birthplace of the sage, Confucius. Thus it stands for all that is conservative and religious in the old Chinese thought.

However, Mount Taishan happens to be in the province of the imaginative reformer, Governor Han Fuchu, and consequently telephone wires are being stretched up the steep sides to the temple at the very top. Just why it is necessary to phone from up there is not clear to the old Chinese who look upon this modernization as nothing short of sacrilege.

Offsetting that, Governor Han is responsible for repairs to the long stone pathway running over the mountain over which the pilgrims tread. Likewise he has established a hotel on the hill for the rest of travelers.

### Preventive Surgery

New Method To Overcome Danger Of Peritonitis

A nearly 100 cent. preventive for surgery's worst death risk, peritonitis, was announced to the American College of Surgeons at Boston. The preventive is a vaccine, called amniotic fluid, and its discovery came from the study of babies during Caesarean operations. In these operations, Herbert L. Johnson, M.D., of Boston, noticed that the mothers suffered fewer abdominal adhesions than usual.

Several years' study led to virtual certainty that the protection was due to the amniotic fluid which surrounds a child before birth. The same, or a similar fluid, is present in the higher animals.

Thus the animals would furnish a source for this fluid if it could be used in other than Caesarean surgery.

Wet shavings on the floor of a refrigerator car was the simple and inexpensive method adopted by U.S. specialists to keep bears and apples from freezing in transit from the northwest to eastern markets in moderately cold weather.

### Solving Crossword Puzzles

British Leaders Work On Them In Leisure Moments

Sir Josiah Stamp, eminent economist and chairman of the L.M.S., writes to the London Times that he solved one of that newspaper's recent crossword puzzles in 50 minutes. But Sir Austen Chamberlain countered with the claim to have done it in 41 minutes. Lord Russell of Lilloreth claimed he once did it in 12 minutes 59 4-5 seconds, he says, but perhaps his stop watch was not working accurately. The official record to date seems to be 10 minutes, but frankly we have no faith in the claim. The unofficial record is that of the Provost of Eton, who is said to time the solving of his morning egg by the time it takes to complete the morning puzzle. (Possibly he likes hard-boiled eggs).

Some people boasted of the lethargy of their minds when working on crossword puzzles. P. G. Wodehouse and E. V. Lucas admitted their humbleness and Lord Moylnah wrote learnedly and ironically on the "quality of mind" required for rapid solution.

But his irony was as nothing compared to that in a letter which read: "Sir—Sir Josiah Stamp will be interested to learn that on a recent occasion I solved the 'Times' crossword puzzle while travelling between two consecutive stations on the L.M.S., the journey between which takes normally only 3 1/2 minutes."

Strange people, these Britons. What railway chairman, what political leader in Canada would admit that he did cross-word puzzles in his leisure moments?—Financial Post.

### Responsible For Defence

Sam Harris, president of the Navy League of Canada, told an east-end business men's club in Toronto, Canada could no longer morally and ethically depend on the British navy for naval defence or protection of trade routes. As a self-governing country, he stated under the provisions of the statute of Westminster, she was responsible for taking care of herself.

Radio is not a cause of drought, as suggested in some quarters. Marconi, the inventor of wireless, declares, and he calls attention to the complaint sometimes heard in wet summers that wireless caused rain.

## Hudson Bay Sailings

Fifteen Vessels Cleared From Port Churchill This Season

Carrying 4,049,877 bushels of wheat to the markets of Europe, chiefly Great Britain, 15 vessels cleared from the Hudson Bay port of Churchill, Man., during the 1934 navigation season.

In substantial quantities, a variety of additional exports also were shipped from Churchill, both in grains and other produce. These comprised 6,150 bushels of oats, 3,795 tons of flour and mill stuff, seven tons of honey, 580 head of cattle and 2,200,000 feet of lumber.

Inward cargo unloaded at Churchill consisted mainly of 450 tons of general cargo and 650 tons of bagged coal from Newcastle, England, and 300 tons of window glass from Antwerp, Belgium.

The season's shipments out of Churchill were as follows: Name of ship, date cleared Churchill, cargo and destination—1, Dalworth, Aug. 22, London, 1,865 tons flour and mill-stuff, 206,488 bushels grain; 2, Rio Claro, Aug. 16, Antwerp, 285,096 bushels grain; 3, Brandon, Aug. 17, London, 324,000 bushels grain, 292 cattle; 4, Grethelad, Aug. 18, Rotterdam, 264,000 bushels grain; 5, Thomas Walton, Aug. 1, U.K. port, 280,000 bushels grain; 6, Eliza, U.K. port, Aug. 24, Cardiff, 225,601 bushels grain; 7, Nalissamoor, Sept. 4, Queenstown for orders, 256,036 bushels wheat, 4,076 bushels oats; 8, Burgerdyk, Sept. 7, Antwerp, 338,000 bushels grain; 9, Lankenswood, Sept. 14, Antwerp, 258,000 bushels grain; 10, Charles, L.D., Sept. 17, Antwerp, 320,000 bushels grain; 11, Bildeydyk, Sept. 21, London and Antwerp, 277,284 bushels grain, 1,400 tons mill-stuff, 500 tons honey; 12, Alma Dawson, Sept. 28, Liverpool, 220,000 bushels wheat, 1,200,000 feet lumber; 13, Ashworth, Oct. 4, U.K. port, 228,800 bushels grain, 1,000,000 feet lumber, 500 tons mill stuff; 14, Grethelad, second trip, Sept. 28, Manchester, 261,000 bushels grain; 15, Brandon, second trip, Oct. 4, U.K. port, 25,600 bushels wheat, 2,073 bushels oats, 288 head cattle.

## Analyzing Human Brain

Moscow Scientists Want To Know What Makes Some People Clever

The Moscow Institute of the Brain expects through its researches to solve the riddle of why some persons stand out sufficiently from their fellow men so that they are "geniuses."

The institute has been busy collecting the brains of well-known men and women who have died in recent years for its studies. It happens that most of the brains received have been those of Communists, but the institute would have no scruples against examining the brains of bourgeois leaders if it could get them.

The prize of the institute's collection is the brain of Vladimir Ilyich Lenin, whose embalmed body is viewed daily in its huge mausoleum on the Red Square and so much does the institute think of the possibilities of solving the sources of the power that went into the making of the Russian revolution, that it has set aside a whole department where Lenin's brain is minutely studied.

Recently the institute received the brain of Leonid Zelenin, the aged German revolutionist, who once opened the reichstag with a speech denouncing the Nazis.

The first step in studying a brain, before it is subjected to microscopic examination, is to cut it into nearly 15,000 shreds of extreme thinness.

The researchers seem to show that the explanation for high intellectual capacity lies in peculiarities in structural relation of different regions of the cerebral cortex. Newly constructed apparatus has enabled the institute to record on graphs the electric currents set up in the brains of live persons and animals.

## Makes A Difference

In a recent issue the St. Louis Post-Dispatch published a photograph of Chinese coolies loading silver bars on a truck at Shanghai. The truck was an open one and the metal was clearly exposed to view. What? No armored conveyance, no guards armed with machine guns, nothing to distinguish between loading silver and loading hay? It just goes to show how different things are done in an uncivilized country.

The news reel in a downtown movie had just shown the King and Queen of Italy receiving the plaudits of the people of Rome. Then the announcer said:  
"And here is 'Il Duce.'"  
"Ray," exclaimed a woman, "he looks just like Mussolini!"

It is reported that 74 per cent of the medical students in Soviet Russia to-day are women.

## Correct Nutrition

Proper Preparation And Cooking Of Food A Prime Necessity

A connection between light and food was established, and the conclusion was drawn that fresh food or "sunlight food," as it was called, possesses in the quality of freshness, a virtue absent from all other kinds of food. Students, happily, did not rest content with a generalization of this sweeping and vague kind, and the work upon vitamins was continued. Today several of these elusive substances have been obtained in more or less pure form. In consequence there has been substituted for the conception of "freshness" exact knowledge about special chemical composition. Some of the vitamins indeed are so little "fresh" in the popular sense of that word that they can be heated to high temperatures without losing their virtue.

For a moment a danger seemed to exist that this discovery would lead to a reaction away from natural foods towards foods compounded in laboratories. But it is now becoming clear that great as has been the progress made in the elucidation of vitamins, or rather virtues, remain about which full and exact knowledge is not available. Food charged artificially with vitamins is not, apparently, "just as good" as natural food. There exists some further, essential substance about which Nature alone possesses the secret.

In these circumstances a new study of natural foodstuffs has been undertaken and although many have been made to arrive at such knowledge as can be placed at the disposal of the housewife and cook. Knowledge exists, but it has not reached the mass of the people. In consequence the incidence of malnutrition mortality, to take but a single example, remains higher than it would be if young girls and young women knew how to buy and prepare food in accordance with scientific principle. As Dr. Leslie Harris told the Industrial Welfare Conference at Oxford, correct nutrition cannot be left entirely to chance or instinct, but must be based on knowledge and experience.

The dissemination of knowledge is, evidently, the first step towards the acquisition of a sound experience, and it is here, undoubtedly, that the need of action is greatest. Teaching must be given at a time when it can be made use of and in such a manner that it will be understood. It has often been pointed out that the mortality among infants began to decline in this country when the generation of schoolgirls who had received the earliest instruction began to become mothers. The decline in infant mortality has continued steadily since that time. There can be little doubt that instruction in the buying and preparation and cooking of food, if given as effectively, would bring about a similar diminution in the incidence of many existing diseases and weaknesses. For it is not only upon the history of medicine that dietetic habit casts influence but also upon the history and welfare of peoples.—London Times.

## Grows Huge Vegetables

Ottogenerian In Ontario Makes Success Of Good Hobby

Following a lifetime of wrestling his living from the soil, Frederick Sharp, ottogenerian retired farmer of Poltimore, Ontario, and his wife are specializing in growing vegetables and other farm products out of the ordinary in regard to size.

Potatoes weighing three pounds each, carrots upwards of two pounds each, cobs of corn over a foot in length and containing up to 550 kernels are some of the produce grown by Mr. Sharp in his 91st year. He picks his own seed.

Mr. and Mrs. Sharp do all the work on the one-acre plot. The two old people, who last July celebrated the diamond jubilee of their marriage, plant the seed and care for the crops throughout the summer. In addition Mrs. Sharp finds time to do her own housework, take bread for the family. Mr. Sharp has worked for the winter months. During the past summer he cut eighteen cords of hardwood, which he estimates will last them until next summer.

The conductor stopped to help the stout lady board the car: "You should take yeast, mother, 'er 'elp yer to rise better."

"Take some yourself, lad," she replied, "and then yer'd be better bred."

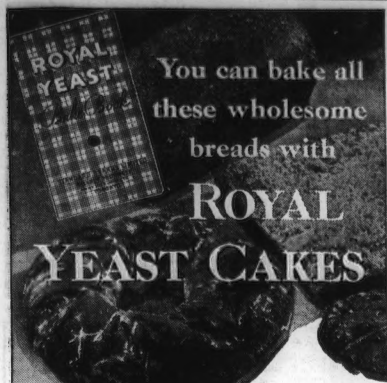

The robin is far from dependable as a harbinger of spring; many of these birds do not go south for the winter, provided they can find plenty of food and a well-protected shelter.

A drought takes heavy toll of fish in streams and rivers.

## FANCFUL FABLES

**ROYAL YEAST CAKES**

You can bake all these wholesome breads with **ROYAL YEAST CAKES**

Full leavening power is assured with Royal Yeast Cakes. Individually wrapped in air-tight waxed paper, they reach you in perfect condition. And they stay fresh for months. No wonder Royal Yeast Cakes have been the standard for over 50 years. Today—they are preferred in 7 out of every 8 Canadian homes where dry yeast is used.

FREE—The "Royal Yeast Cake Book" to use when you bake at home. 23 tested recipes—loaf breads, rolls, buns, coffee cakes! Address Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont. Ask, too, for leaflet, "The Royal Road to Better Health."

## THE TENDERFOOT

By **GEORGE B. RODNEY**  
Author of "The Coronado Trail",  
"The Canyon Trail", Etc.

### SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. The Broken Spur has been everlastingly looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening for himself—not as Gerald Keene, half owner of the Four-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wilderness outfit.

Dad Kane, desert rat and luckless prospector till now, is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich old mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Joe Carr's daughter, Edith, repulses Dustin when he wished to make her acquaintance, saying when she walked with a man, it would not be with a squaw man. He plans revenge, but has had no opportunity so far. Affairs on the ranch going from bad to worse, Joe Carr takes to drink.

(Now Go On With The Story)

CHAPTER IV.—Continued

Spike gaped at him. Then very slowly realization came. His eyes gleamed and his red face got redder and his wire-stiff beard seemed to bristle like the mane of an angry bound.

"... You know how these damned old fools of prospectors talk. They matters worse old Kane can square himself with Joe Carr by letting him in on what he found on the Hour-glass land. See now?"

never see any one to talk to in six months. When they do get a chance

the dam gives way and there's a flood. If old Dad Kane goes in to Seco he'll tell about his gold-appeal just as sure as God made him find it. He can't help it. The matter of Gray and Corse is bound to come out. ... Still Spike stared at him. The full import of what Dustin said had not yet sunk in.

"They'll hardly dare tell what they done," he growled. "I'll mean jail for them, too."

"They'll turn State's evidence and get exemption. That's the way Burke, the Prosecution Attorney, wins his cases. You poor fool! Can't you see? You'll look good in a striped suit. ... If it gets that far."

"What do you mean by that? If it gets that far?"

"Huh. That's easy. We're none too popular in the Valley. There ain't a Dry Farmer in thirty miles that don't want our holdins. If we win that suit over Soda Springs I'll throw 'em on public lands. They'll be open to all the Dry Farmers. They can water their sheep there, too. That'll ruin 'em for cattle. Even you know that."

Spike nodded at that truth; the real reason for the constant feud between sheep and cattle-men.

"It will make no difference to you an' me," said Dustin hotly. "We'll be tucked away where nobody can hurt us. ... I tell you. ... We're in a hell of a mess. Old Dad Kane know now just what our men have been doing. Those men will swear, to clear themselves, that they were only carrying out orders from us. I'll all come out. ... To make Spike Goddard licked his lips in silence and stared at his partner with a feral glare that promised ill to his enemy. He was not a particularly strong man but like most men of his kind, when driven to bay he could fight desperately.

"Well," he croaked, "what's the answer?"

## The Full Value of Cod Liver Oil

### PLUS A QUICKER RECOVERY AFTER ILLNESS

To recover the strength and vitality exhausted by illness—we must have energy-giving food that can be quickly and easily absorbed by our bodies.

Scott's Emulsion gives you greater recuperative powers because it is an easily and quickly digestible form of Cod Liver Oil in a solution of bone building hypophosphites of lime and soda—PLUS values you get in Scott's Emulsion of Cod Liver Oil.

# SCOTT'S EMULSION

THE COD LIVER OIL WITH THE PLUS VALUE  
For Sale by Your Druggist

"That's easy. ... Dustin drew a breath of relief. To plan as he had planned in the last ten minutes was one thing. But man planning development needs help. He knew now that he could count on Spike as never before. Dustin went on:

"... You and me, Spike, have made too much off the Hour-glass to let it ever get into court. Even old man Carr with all his drunken suspicions, don't know what we've milked him for. Thank the Lord we've been too careful to show the source of our income but ... We've got a nice wad of cash right now in the office safe. Too dangerous to put it in the Seco bank. I figured we might need it for a get-away if some one spills the beans. ... Like old Dad Kane. He can do it any minute he chooses to open his mouth and talk. The matter boils down to this. ... Old Dad Kane has come in here with the finest ore we've ever seen. It was found on the Hour-glass lands and old man Carr doesn't know of it. While he was looking for that ore, old Kane found some of our men at work and can send us to jail for what he saw 'em doin'. Get me? You know what's got to be done. I needn't name 'em. What's the answer?"

Spike Goddard knew that answer but like his partner he dared not put it in speech. Dustin finally dared it. "Old Kane has got to show us where he found the stuff and then he's got to disappear," he said.

For a long moment silence fell, a silence in which a cricket in the wall chirped loudly and the ticking of the clock on the table sounded like the crack of doom. Spike poured himself another drink. He needed it badly. He knew what was meant.

"How," he asked hoarsely.

"The less you know personally about it the better for us both," said Dustin. "It's a one-man job and I trust no other man where my own life is at stake. All I say is that I'm not going to let to please old man Kane or Carr either. Suit you?"

"It sure does. ... Spike had sudden visions of himself in a striped suit and he did not admire it. "I'll help you. ..."

"Help me hell," said Dustin fiercely. "I tell you it's a one-man job. One-and-a-half that is. First I'm going in to Seco on business. Be sure you keep old Dad Kane here. Don't let him leave on any pretext. Tell him I've gone to make arrangements for him to go back to open the mine. Keep him here till I get back. I want to find out all I can about Kane's finances."

"But, from all I hear he ain't got any. How'd you find out?"

"I've got ways you never thought of. ... Dustin grinned as a coyote grins at sight of game. "The really big thing for us just now is to make Kane show us exactly where his location is. It'd be right right to have him disappear and then find out we don't know where he found the gold."

He poured himself another drink and picked up his hat.

"I'll be on my way," he said. "Be sure you ride hard on Kane."

Spike watched the departing car and when its following dust-cloud was swallowed up turned away to the kitchen.

He was under no illusions as to what Dustin meant when he said that Kane must disappear. During the many years of their partnership he had seen some curious things. Sometimes he thought that that very partnership was the only reason for their mutual safety. Either could hang the other by too much talk. He knew Dustin was cautious and ruthless and he knew suddenly that his "find" of old man Kane would put them both beyond any further need of more money. Dustin was right.

"He'll probably bring home the bacon," he muttered. "Even if he has to kill somebody else's hog to get it."

That was exactly what Sam Dustin proposed to do. He knew that the conscienceless suit over Soda Springs had cost Carr more than he had. He knew that the Broken Spur depredations on the herds of the Hour-glass had put that ranch in the red. He was sure that Joe Carr must owe a lot of money and he meant to find out to whom he owed it. Dustin believed in the strong hand and he knew that Solomon was right when he said: "The borrower is servant to the lender." It was dark when he parked his car before the sheet-iron-fronted saloon in Seco. He strode down the main street, turned off at a dark alley and stopped at a little frame bungalow set well back in a clump of dusty Chinaberry trees. The door flew open at his knock and, almost instantly, an old woman holding a stinking kerosene lamp above her head, stood facing him.

"Evelyn, Miss Peters," he said civilly enough, "Sum in?"

"He went for the mail," said Mrs. Peters. "He ought to be back in a minute. ... Come in, Miss Peters. There comes Sam now," she added.

(To Be Continued)

## Expert Skin Grafting

London Surgeon Describes Remarkable Results That Can Be Attained  
A method of detouring living skin from one part of the body to another to improve plastic surgery was described to the American College of Surgeons at Boston by Sir Harold Gillies, London surgeon.

The detouring of skin is one of the latest bits of skill. By its use skin, without even losing its living connection with the patient's own blood supply, can be taken from virtually any part of the body, even the back, and transferred anywhere else.

By this method skin has been taken from the outside of the body and detoured to interior cavities to save life.

The detour trip across or lengthwise of the body takes up to nine weeks. The method is known to surgeons as the tubed pedicle flap. The "flap" looks like the handle of a valve.

For detouring abdominal skin to the face, a square section of abdominal skin is first loosened along two opposite sides, lifted and rolled into the form of a valve handle.

This handle or flap remains fully alive nourished by blood vessels at each end, until it gets accustomed to its semi-independent form of life.

Next one end of the flap is cut free and grafted to the forehead, which can be placed near the abdomen. Over a period of several weeks the skin gets accustomed to this change.

Then the flap handle is detached from the abdomen, but left fastened to the forehead. The forehead is then free to be raised to the face, or whatever the new skin is wanted. The flap's free end is grafted in place on the face. Then finally it is detached from the forehead and the grafting completed on the face.

Sir Harold explained this makes it possible to transfer living skin which contains not only the thin surface but underlying fat and blood vessels.

## THE RHYMING OPTIMIST

By Aline Michaelis

COLUMBUS

To-day the sailor goes on ways as sure

As those of some familiar street at

For him the sea has lost that old allure

Which drew to brave hearts called through wind and foam.

The touch of danger mingled with the scent

Of tar and salt in days Columbus sailed

Out ways unknown to find a continent

Beyond those depths at which the boldest quailed.

Ah! When was ever man as brave as he,

Who ventured with his flimsy caravel

Upon the untrodden waters of a sea

Whose outer verge no soul on earth could tell?

For him, to meet those weeks of awful test;

For him, to tread on glory's topmost crest!

## Builds Model Engines

Minatures Turned Out By Halifax

Engraver Work Perfectly

A tiny but practical model of an overtype, 16 nominal horsepower engine with loose eccentric piston valves will be exhibited by its maker, David Briggs, Halifax engraver, at the Nova Scotia provincial exhibition.

The small but powerful contraption turns a model aeroplane swing, and three tumblers of water in the wee boiler will keep it going for over an hour.

There are more than a thousand intricate parts of steel, copper and brass but it only took the miniature machinist three months to put them together. Mr. Briggs, whose hobby is mechanical models, has also constructed a working reproduction of the mechanism of a paddle-wheel ferry steamer which will fit in a suitcase and engaged his spare time for 17 months; a tug boat engine; and a larger overtype engine which will generate power for 120 minutes.

## Something To Know

If you want to revive wilted lettuce or other salad greens, put them in a pan of ice water to which has been added a cupful of vinegar. Let them set for half an hour and they'll be quite crisp. Incidentally, if you wrap lettuce in a damp towel and stick the ends of it to a dish of water, it will keep fresh for days.

Only 94 Englishmen have an income of more than \$500,000 a year; 89,790 earn more than \$10,000 a year, however.

## Free Samples at Druggists of the Remarkable New Aid in the Prevention of Colds

Local Druggists Are Now Offering A Free Trial Of Vicks VapoRub For Nose and Throat—Also Of Its Ideal Companion, Vicks VapoRub

### NEW PREVENTION IDEA

This Discovery Introduces Unique Vicks Plan For Better Colds-Control

### HOW VICKS PLAN WORKS

Following years of research on the problem of colds, Vicks Chemists have developed a new aid in preventing colds—Vicks VapoRub, for nose and throat. This new Vicks preparation is the ideal companion to Vicks VapoRub, the modern method of treating colds.

These two Vicks preparations, together with a few simple rules of health, form the unique Vicks Plan for Better Control of Colds. The helpfulness of the Plan in reducing the number and duration of colds has been clinically tested by physicians. (Full details of the Plan are in each package of Vicks VapoRub and of Vicks VapoRub.)

Briefly, here are Vicks Plan works:

To Help Prevent Colds Watch yourself and children after exposure to any condition that you know is apt to be followed by a cold, such as—

Contact with others having fresh colds—colds, stuffy, ill-ventilated rooms, public places—sudden changes in temperature—excesses in living, such as over-eating, smoking, drinking, which reduce body resistance.

To Help Shorten a Cold

If a cold has developed, rub Vicks VapoRub over throat and chest at bedtime. Through the night, VapoRub attacks the cold direct—two ways at once—by stimulation, direct through the skin, like a poultice or plaster—and by inhalation of its medicated vapors direct to the inflamed air-passages. This long-continued double action loosens phlegm, soothes irritated membranes, eases difficult breathing, and helps break congestion.

During the day—any time, any place—rub Vicks VapoRub every few hours as needed. This gives you full 24-hour treatment without the usual Vicks Plan for Better Control of Colds, which so often upsets the digestion—especially of children.

Trial Packages Free

Your druggist has free combination packages containing trial sizes of Vicks VapoRub and Vicks VapoRub—also folders telling how these twin aids to fewer colds and shorter colds are used in Vicks Plan for Better Control of Colds. Ask for yours today, as your druggist's supply is limited.

Little Help For This Week

"Wherefore beloved he diligent that ye may be found of Him in peace, without spot, and blameless." 2 Peter 3:14.

His conscience knows no secret stings. While grace and joy combine To form a life whose whole springs Are hidden and divine.

—Isaac Watts

Even the smallest discontent of conscience may render turbid the whole temper of the mind; but only produce the effort that restores its peace, and over the whole atmosphere of life, the unexpected purity is spread, doubt and irritability pass as clouds away, the withered sympathies of earth and home open their leaves and live, and through the clearest blue the deep is seen of the heaven where God resides.—J. Martineau.

The state of mind that is described as meekness, or quietness of spirit, is characterized in a high degree by inward harmony. There is not as formerly inward jangling of thought contending with thought, and conscience asserting rights which it could not maintain.

The Right Thing A truck driver stalled his machine on the tracks as a fast express was coming. The truck was smashed but the driver stepped out in time and watched the performance. Looking in our reference book on "How to Act in an Emergency," we find the truck driver did exactly what he should have done.

## More Cars In British Columbia

Number Increased By Over 2,000 In Last Year

An increase of more than 2,000 automobiles in the last year in British Columbia is shown in a report completed by Inspector G. A. Hood, of the motor record office. At the end of September there were 70,938 passenger vehicles operating and 15,642 piled in the commercial trade.

Last year at the same time there were only 69,373 passenger cars on the road and 15,051 commercial cars. This represents a combined increase of 2,136.

How To Avoid Illness

When you begin to feel fagged out at the end of the day, look out. Illness is just around the corner waiting to lay you low. At times like this there's nothing like Wincinac, the great tonic that has won over 20,000 recommendations from medical men.

Wincinac is a delicious wine, not a drug. In each bottle there are all the nutrients of Wincinac—25 lbs. of grapes added to the strengthening elements of beef and guaranteed milk.

These elements in Wincinac will quickly restore lost energy. They will help you to sound sleep, vigorous awakenings and active, enjoyable days. Drink this delicious wine regularly three times each day, and soon you will drop from your shoulders.

Wincinac is a tonic, not a drug. It picks up your nerves, enriches your blood, or in cases of nervousness, insomnia, exhaustion and debility, takes Wincinac. At all druggists—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

New Industry

Plant For Production Of Sodium Sulphate May Come To Saskatchewan

Establishment of a new industry in Saskatchewan, believed to be for the production of sodium sulphate, is being contemplated by a firm of manufacturing chemists with head office in New Jersey, and branch offices in Montreal and Toronto.

Government officials received a communication recently from officials of the firm asking for detailed information concerning labor and coal costs, and other particulars.

The location of the plant, according to the letter, would be in southern Saskatchewan, near the United States border, some 12 miles from the nearest railway.

About 300 tons of steel are turned into 5,000,000 can openers every year in the United States.

## Jumpy Nerves

Yield to the soothing action of this medicine. You will eat better ... sleep better ... feel better ... look better. Life will seem worth living again. Don't delay any longer. Begin taking it today.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

The moon was believed to be made of glass before the invention of telescopes. The dark markings on it were thought to be the reflection of land and sea areas on earth.

Practically every part of the cow, including the blood, is used in making aeroplanes.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Indigestion, Headache, or any of these, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 86 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it and on the label.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Bob Sutherland disposed of his farm equipment and livestock by auction on Wednesday. Prices secured were on only fair.

More than \$400.00 in cash and cheques was the loot obtained from the "Jeakins" Groceries at Olds when the safe was blown early Sunday morning.

**Remembrance Day**

I am writing these few lines on the eve of the 10th anniversary of the Armistice, with the object only of recalling those years of war. There isn't a day in modern history that is more universally thought of, or more reverently observed than the 11th day of November 1918. As the anniversary of this day approaches, my mind goes back to those days when battalion after battalion were leaving for Overseas service; and I see the station platform crowded with people as the train is steaming slowly out with its load of men; I see the waving of handkerchiefs from the carriage windows far into the distance, which signify a farewell or perhaps goodbye. Months or may be years pass on, and the postman on his daily round with his bundle of censored letters was watched at every turn with eager eyes, perhaps never before or since has he been of such consequence. The telegraph messenger also played his part, though I believe he was looked upon more as a bogey.

After this period, this rugged, winding, eventful period, mid shot and shell, day and night, year in and year out unceasingly, came the historic day when the guns ceased to speak. And as I remember, it was a day of remarkable quietness, in the air and all around, and the men were thinking of the home coming, with its royal reception awaiting them, or perhaps its vacant chair.

While the Armistice as we know was the end of the war, it was only the beginning of a Remembrance Day. As the years pass on and the anniversary of this day comes and goes; as the many floral tributes are brought and placed on the various cenotaphs, and memorial services held there, and in our churches, it brings to us one common thought of our profound respect for those who were called upon to rest. And as they sleep under, and the tumult of battle is over, we know them in life, we remember them in death, on this great Remembrance Day.

H. M. Seville.

**J. W. A. Hallowe'en Party**

The Crossfield Junior W. A. entertained the Olds Juniors at a Hallowe'en party in the basement of the Masonic Hall. The members from Olds came in cars provided by Messrs Templeton and Kemp. Forty-eight sat down to supper at a very tastefully decorated table. The room itself was also decorated with emblems suitable to the Hallowe'en season.

The Crossfield Juniors (after supper was cleared away) put on a very successful entertainment, consisting of songs, recitations, piano duets and two guessing contests. Miss Irene Walker welcomed the Olds members in a few well chosen words.

The entertainment broke up at 9.30 p.m. all expressing delight with the lovely evening spent.

A number of mothers of the Crossfield Juniors were also present.

**Mission Band Tea**

The Mission Band of the United Church held a Hallowe'en tea at the home of their leader, Mrs. P. H. Fleming on Thursday afternoon. The girls served the tea, exhibited some of their needlework; and entertained the guests with piano selections. The rooms were tastefully decorated for the occasion.

The Mission Band plan to hold a tea and sale of needlework in the near future.

Hon. H. A. Stevens, Minister of Trade and Commerce in the Bennett Government, resigned his cabinet position on Saturday. He is the member for East Kootenay, B.C.

Wheat yielding about 60 bushels to the acre and oats about 100 bushels is this year's record on the farm of Herman Trele, Wembley wheat wizard.

**BIRTHS**

BORN—To Mr. and Mrs. Alfred Arnold on October 29, a son at the Collins Nursing Home, Crossfield.

BORN—To Mr. and Mrs. E. L. Fries (Nov. 1), a son at the Collins Nursing Home, Crossfield.

**Physical Training Classes**

Tuesday, November 6th.

Annual Meeting November 13th.

The annual meeting of the Crossfield and District Amateur Athletic Association will be held in the Fire Hall on Tuesday, Nov. 13th at 8 p.m. for the purpose of electing officers for the ensuing year and transacting other general business of the Association. All members are requested to attend, and all others who are interested in the affairs of the Association are cordially invited to be present and to have a voice in the meeting.

The Physical Training classes will commence in the U. F. A. Hall on Tuesday, November 6th, at 7.30 p.m. Classes will also be held on the Thursday and Monday following and will continue each Monday, Wednesday and Friday until further notice.

It has been suggested that Instructor Gravel hold two classes each evening instead of one large class. The first class, consisting of juniors to commence at 6.30 p.m. and the second class, consisting of seniors, to commence at 8 p.m. Such a plan would give each class much more room in which to do its exercises. It has also been suggested that there be placed a comments and criticisms box in the hall during classes, in which members or others will be asked to place notes of criticism or other comment for the consideration of the Instructor or of the Executive Committee. Such notes would not require a signature.

Instructor Gravel is hoping to have a large class ready for work on Tuesday and you may be assured that he will have many new stunts with which he will keep the members interested during the winter months.

Funeral services for Mrs. Marjory McEachen, first white woman to reside permanently in Cochrane, who died Thursday, were held Saturday morning from St. Mary's Church in Cochrane.

**Hallowe'en as it Should Be**

Hallowe'en passed off very quietly here, there was no damage to property of any kind. Constable Cameron, assisted by Town Constables Belshaw and Nicol, had the situation well in hand.

The youngsters masked and made up to some extent, made the rounds of the houses collecting apples, candies, etc., while some of the older boys started out to do things by rolling a large gasoline tank onto the Main Street, but Constable Cameron made them roll it right back again; the Constable also insisted that they set up a back-house they had pushed over. The wind was taken completely out of their sails.

**CAR OF SALT**  
On Track  
50 lb. sack Cattle Salt 75c. \$28.00 ton  
50 Block White Salt 85c. \$33.00 ton
